Final Approach

The design system, version 2, for a top-down air traffic game that looks like a box of toys tipped onto a lawn.

FOUNDATIONS

Principles

1

Toy scale

Sizes are exaggerated, not realistic. A jumbo is nearly twice a light prop.

2

Silhouette before colour

Types, zones and states are told apart by shape first. Colour confirms.

3

The field stays clear

UI lives in flat strips at the edges. Nothing covers a landing zone.

World: nine rules for everything on the ground

W1 **One sun, top-left**
Every object is lit from the top-left: a lit tone to the north-west, a shade tone to the south-east, a hard shadow cast down-right.

W2 **Three tones per material**
Light, base and shade, as flat shapes. Never a gradient. A sprite uses at most three materials.

W3 **Navy outside, tinted inside**
The silhouette is outline. Lines inside it are darker tones of their material. Only a small part that stands on the sprite, such as a chimney or a window frame, keeps a thin outline of its own.

W4 **Line weight is rank**
Aircraft 4, landing zones 3, scenery 2.5, inner detail 1.25. The thickest line is always an aircraft.

W5 **Standing things show a south wall**
Buildings, trees and the tower lean a little: roof on top, wall below, in one of three height tiers. They never rotate.

W6 **Flat ground has no outline**
Roads, fields, water and aprons are edged in their own darker tone. Only things with height, and landing zones, earn a navy line.

W7 **Edges are transitions**
A runway has a shoulder and rough grass, water has shallows and sand, a road has a kerb and a verge.

W8 **Detail clusters, open ground rests**
Tufts, flowers and props gather around objects and edges. Only the airfield is mown in stripes.

W9 **Aircraft own the top of the range**
The brightest white and the most saturated colours belong to aircraft and paths. Scenery whites are cream.

UI: seven rules for controls and panels

U1 **Moulded, not boxed**
A control is a face, a highlight along its top edge and a lip in its own 700 tone, wrapped by one thin outline.

U2 **A lip means pressable**
Buttons, cards, the toggle knob and the selected segment have a lip. Readouts, chips and stickers are flat.

U3 **Thin line, thick form**
The UI outline is 2.5dp. Depth comes from the lip and a flat contact shadow.

U4 **Tinted inside**
Dividers, keylines and chip edges take a darker tone of their surface. Navy is for the outer edge and for text.

U5 **Nested radii**
An inner corner is the outer radius minus the gap between them.

U6 **Tower paperwork**
HUD readouts are flight strips, dialogs are boarding passes with a perforated stub, verdicts are stamps.

U7

Disabled is flat, not faded

A disabled control loses its colour, lip and shine and keeps full opacity.

FOUNDATIONS

Colour

151 colour tokens in three themes: Day, Night and Dawn. Materials and accents are ramps with fixed roles: 300 is the lit tone, 500 the base, 700 the shade or the lip, 900 the tinted inner line, 100 and 200 a highlight. Swatches follow the theme switch; values list Day first.

Ink and edges

outline
`#1d2545`
`night #0a0e24`
The outer edge of every drawn shape: aircraft at line-hero, landing zones at line-zone, controls, panels, flight strips and scenery silhouettes at line-ui. Never pure black. Lines inside a shape are a darker tone of that shape, not outline.

ink
`#1d2545`
Primary text and icons on paper. The same in every theme: paper stays light at night.

ink-muted
`#4f5a7c`
Secondary text, captions and hints on paper; the label of an unselected segment.

ink-3
`#7c86a6`
The label of a disabled control, and the quietest text on paper. Never for text a player must read to continue.

on-sky
`#1d2545`
`night #f6f2e4`
Text and icons placed straight on bg-sky, sky-100 or sky-300, outside any panel: menu titles, version line.

on-sky-muted
`#2f3b63`
`night #b5bfdd`
Secondary text straight on bg-sky, sky-100 or sky-300.

on-accent

`#1d2545`

Text and icons on any bright fill: sun, tangerine, cherry, mint, sky-500, star and every path colour. Dark in every theme because the fills stay bright.

on-outline

`#fffaf0`

Text and icons on an outline-coloured fill: coach marks and the callsign tag.

focus

`#ffffff`

Inner band of the two-tone focus ring: a line-ui band of focus, then a line-ui band of outline outside it. One of the two always holds 3:1 against whatever the ring lands on.

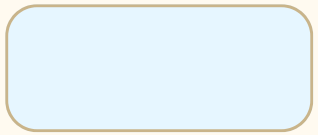

Sky

bg-sky

`#8fd3fb`
`night #151c40`
`dawn #6c6a92`

Background of menus and every non-gameplay screen. The sky the UI lives in.

sky-100

`#e6f6ff`
`night #1c2654`
`dawn #3a3d6b`

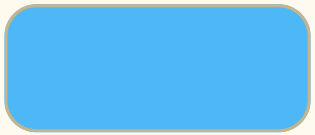

Quietest backdrop tint on bg-sky: far cloud bank, sunburst rays on menus. Text on it is on-sky.

sky-300

`#a9defc`
`night #2b3a82`
`dawn #55578a`

Backdrop stripes and near cloud bank on bg-sky. Text on it is on-sky.

sky-500

`#4db8f5`
`night #5aa8f0`

Secondary button fill, info status, active toggle track. Text on it is on-accent.

sky-700

`#1668ad`

Lip of a secondary button; links and emphasised text on paper.

sky-900

`#0f4c80`

The bottom edge of a sky lip, and text on sky-tint. sky-700 is the lip of a secondary button; sky-band is its highlight.

sky-tint

`#e6f6ff`

UI only. The fill of a sky chip and of an icon tile. The same in every theme, because paper and what lies on it stay light at night. sky-100 is a backdrop tint and goes dark.

sky-band

`#a9defc`

UI only. The header band of a neutral dialog, the edge of a sky chip and of an icon tile, and the highlight on a secondary button. The same in every theme. sky-300 is a backdrop tint and goes dark.

Paper: UI surfaces

paper-0

`#fffdf8`
`night #fffaf0`
`dawn #fbf5e6`

The lightest paper: the face of a ghost button, a toggle knob, a level-card lock badge.

paper-100

`#fffaf0`
`night #efe9d8`
`dawn #f4ebd8`

The default surface: panels, dialogs, flight strips, level cards. Same values as the v1 surface token.

paper-200

`#f8eed8`
`night #e2dbc8`
`dawn #ebe0c8`

A band on paper: a panel header, the label cell of a flight strip, the face of a disabled control.

paper-300

`#eddfc2`
`night #d5cdb8`
`dawn #e0d3b6`

Wells and keylines: the toggle track, the segmented trough, lines between stat cells, the lip of a ghost button.

paper-400

`#dfcda9`
`night #c4bb9f`
`dawn #d0c09d`

The lip of panels, dialogs and level cards; the inner top edge of a well.

paper-500

`#c9b48a`
`night #a89f84`
`dawn #b8a67f`

Tinted lines on paper: the perforation of a dialog, the dashed rule under a panel header, the bottom edge of a paper lip.

Accents

sun

`#ffcb3d`

Primary button fill, score, warning status. The game's signature yellow. Text on it is on-accent.

sun-200

`#ffe693`

Highlight on a sun fill: the top edge of a primary button, the label cell of the score strip.

sun-500

`= sun`

Base tone of the sun ramp. The same colour as sun.

sun-700

`#e39a12`

Lip of a sun control; the edge of a sun chip. Replaces sun-deep.

sun-900

`#b87407`

The bottom edge of a sun lip.

tangerine

`#ff8f33`

Streak badge, highlights, second aircraft livery. Text on it is on-accent.

tangerine-200

`#ffc998`

Highlight on a tangerine fill.

tangerine-500

`= tangerine`

Base tone of the tangerine ramp. The same colour as tangerine.

tangerine-700

`#d9641a`

Lower edge of a tangerine sticker. Replaces tangerine-deep.

tangerine-900

`#a94b08`

The darkest tangerine: a tinted line on a tangerine fill.

cherry

`#ff5d52`

Lives, destructive buttons, collision alerts. Text on it is on-accent.

cherry-200

`#ffb5ae`

Highlight on a cherry fill; the header band of a dialog that reports a failure; the face of the control tower roof in light.

cherry-500

`= cherry`

Base tone of the cherry ramp. The same colour as cherry.

cherry-700

`#c9302c`

Lip of a danger button; the edge of a cherry chip; the stamp on a dialog. Replaces cherry-deep.

cherry-900

`#9a2320`

The bottom edge of a cherry lip; text of a stamp.

mint-200

`#aaf1df`

Highlight on a mint fill; the header band of a dialog that reports success.

mint-500

`= success`

Base tone of the mint ramp. The same colour as success: the track of a toggle that is on, threshold lights.

mint-700

`#17b08d`

The inner top edge of a toggle track that is on; the edge of a mint chip.

mint-900

`#0b6b59`

Text and icons on mint-200; the check in a toggle that is on. The same colour as success-ink.

Status

success

`#35d6b0`

Safe landing, valid landing zone glow, confirmations. A teal, not a green, so it reads on the lawn and stays apart from cherry for colour-blind players. Always paired with a check icon or a word. Text on it is on-accent.

success-ink

`#0b6b59`

Success text on paper. The same colour as mint-900.

danger

`= cherry`

Collision, miss, wrong landing zone. Always paired with a warning icon or a word.

danger-ink

`#b3221f`

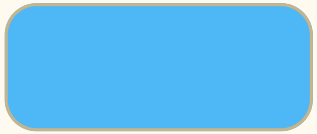

Danger text on paper.

warning

`= sun`

Near-miss warning ring between two aircraft.

info

`= sky-500`

Neutral hints: next-aircraft arrow, tutorial pulses.

Flight paths and liveries

path-1

= sun

Flight path and livery of the 1st aircraft on screen. Path colours are assigned in order and reused once an aircraft lands.

path-2

= tangerine

Flight path and livery, 2nd aircraft.

path-3

= cherry

Flight path and livery, 3rd aircraft.

path-4

#ff7ac8

Flight path and livery, 4th aircraft. Bubblegum.

path-5

#b48cff

Flight path and livery, 5th aircraft. Grape.

path-6

#4fe0e6

Flight path and livery, 6th aircraft. Lagoon.

Ground

bg-field

= grass-500

Background of the gameplay viewport: the airfield lawn.

grass-300

#b4e36a
night #5aa57c
dawn #a29c5f

Light mowing stripe and grass tufts on the field.

grass-400

#97d858
night #4a9571
dawn #969158

Light patches in unmown meadow, and the ground inside a paddock.

grass-500

#7fcf4b
night #3f8a66
dawn #8a8650

Base lawn colour of the airfield.

grass-600

#71c544
night #398060
dawn #7e7b49

The darker mowing stripe of the airfield lawn, and dark patches in the meadow. One step from grass-500, so stripes stay quiet.

grass-700

#5cb337
night #327559
dawn #726f42

Dark mowing stripe, taxiway verge, bushes.

grass-900

`#3b8a2a`
`night #1f5443`
`dawn #4f4d30`

Hedge and tree shade; grass detail next to asphalt.

asphalt-300

`#939cb0`
`night #7a84a6`
`dawn #7c8298`

Runway shoulder and apron wear.

asphalt-500

`#6a7389`
`night #5e6788`
`dawn #585e73`

Runway, taxiway and helipad surface.

asphalt-700

`#474f63`
`night #454d6b`
`dawn #3b4156`

Tyre marks and the touchdown zone on the runway.

asphalt-900

`#343b4f`
`night #30364f`
`dawn #2b3042`

Tyres and the dark inside of an open hangar door.

marking

`#ffffff`
`night #eef2fb`
`dawn #e9e6e2`

Runway centre line, threshold bars, numbers and the helipad H, on asphalt-500 and asphalt-700.

marking-warn

`#ffd23f`
`night #ffd23f`

Helipad ring and hold-short lines, on asphalt-500 and asphalt-700.

sand-300

`#f2d79b`
`night #9c9580`
`dawn #c4ad85`

Scenery only. Beach, dirt roads and savanna tracks; the farmer's straw hat. Never a UI fill: sun is the signature yellow.

sand-500

`#d9b56f`
`night #7f7a6c`
`dawn #a8935f`

Scenery only. The edge and the ruts of a dirt track; the shaded side of sand.

soil-500

`#a8713f`
`night #6e5c52`
`dawn #86603f`

Scenery only. Ploughed fields, tree trunks, fence and jetty wood.

soil-700

`#7d4f2a`
`night #4d403c`
`dawn #5f432c`

Scenery only. Crop-row furrows and the shaded side of wood, on soil-500.

foam

`#f2fbff`
`night #b9c8ea`
`dawn #dcd9e6`

Scenery only. Waves along a shore and the wake behind a boat, on sky-500 water.

concrete-300

`#d7dbe4`
`night #8f97b3`
`dawn #a7967f`

Aprons, helipad pads, runway shoulders, kerbs. Step 300: the slab.

concrete-500

`#c1c7d3`
`night #7d85a2`
`dawn #9e8e79`

Aprons, helipad pads, runway shoulders, kerbs. Step 500: slab joints and the runway shoulder.

concrete-700

`#a2a9ba`
`night #666e8c`
`dawn #91826f`

Aprons, helipad pads, runway shoulders, kerbs. Step 700: the edge of a slab.

road-500

`#8892a8`
`night #6f7999`
`dawn #857969`

Scenery only. Public roads: lighter than a runway, so a road never looks like a place to land. Step 500: the surface.

road-700

`#6d778e`
`night #586180`
`dawn #7a6e5f`

Scenery only. Public roads: lighter than a runway, so a road never looks like a place to land. Step 700: the kerb line.

water-300

`#93dff8`
`night #3f7ac4`
`dawn #8a9886`

Ponds, waterholes and the sea. Step 300: the shallows along a shore.

water-500

#4db8f5
night #2f62ad
dawn #6c8885

Ponds, waterholes and the sea. Step 500: open water. The same blue as sky-500.

water-700

#2b97de
night #214a8c
dawn #5d7b7d

Ponds, waterholes and the sea. Step 700: the edge between shallows and shore.

Scenery materials (decoration only)

roof-500

#cf6a4b
night #8c5863
dawn #a85f4c

Scenery only. Farmhouse and barn roofs. Not a status colour: danger stays cherry.

roof-300

#ec8f6c
night #a96f76
dawn #c27f62

Scenery only. The lit slope of a tiled roof.

roof-700

#a84d35
night #6d4350
dawn #874a39

Scenery only. Tile joints on the shaded slope, the shaded end of a barn wall, a porch roof.

roof-900

#7a3424
night #4e2e3c
dawn #633228

Scenery only. The ridge of a tiled roof and the trim of a barn door: the tinted inner line of the roof ramp.

stone-300

#b9b3a8
night #8d8fa3
dawn #a39c96

Scenery only. Rocks and the elephant. A warm grey, apart from the blue-grey asphalt.

stone-500

#9c968b
night #74778c
dawn #8b857f

Scenery only. The base tone of a rock; stone-300 is its lit facet.

stone-700

#7d776d
night #5a5d73
dawn #6f6a66

Scenery only. The shaded facet of a rock and its cracks.

leaf-300

#8ed35c
night #4d9c7c
dawn #88934d

Scenery only. Broadleaf canopies, bushes and hedges. Darker and cooler than the lawn, so a tree never melts into it. Step 300: the lit lobe.

leaf-500

#55b04a
night #357f68
dawn #708546

Scenery only. Broadleaf canopies, bushes and hedges. Darker and cooler than the lawn, so a tree never melts into it. Step 500: the canopy.

leaf-700

#38923f
night #276657
dawn #637942

Scenery only. Broadleaf canopies, bushes and hedges. Darker and cooler than the lawn, so a tree never melts into it. Step 700: the shaded side.

leaf-900

#236e38
night #184a45
dawn #5a6b3f

Scenery only. Broadleaf canopies, bushes and hedges. Darker and cooler than the lawn, so a tree never melts into it. Step 900: leaf scallops and reeds.

pine-300

#62c092
night #3f8f86
dawn #758b61

Scenery only. Conifers, and painted wood such as shutters. Step 300: the top tier.

pine-500

#3da079
night #2c7473
dawn #657f57

Scenery only. Conifers, and painted wood such as shutters. Step 500: the middle tier.

pine-700

#2a8067
night #215c63
dawn #5d7251

Scenery only. Conifers, and painted wood such as shutters. Step 700: the bottom tier.

pine-900

#1b5f52
night #154451
dawn #576549

Scenery only. Conifers, and painted wood such as shutters. Step 900: tier edges.

wood-300

#cf9f69
night #8f7a70
dawn #a47e51

Scenery only. Trunks, fences, doors, jetties. Step 300: the lit face of a rail or plank.

wood-500

#a8713f
night #6e5c52
dawn #936c42

Scenery only. Trunks, fences, doors, jetties. Step 500: the base tone.

wood-700

#7d4f2a
night #4d403c
dawn #815e3a

Scenery only. Trunks, fences, doors, jetties. Step 700: the shaded side.

wood-900

#59341a
night #33292b
dawn #715334

Scenery only. Trunks, fences, doors, jetties. Step 900: window frames and plank joints.

straw-300

#f1de98
night #a39f78
dawn #b39763

Scenery only. Wheat fields and hay bales. Paler than sun, which belongs to the UI. Step 300: the field and the lit side of a bale.

straw-500

#dcc163
night #8a8762
dawn #aa8c4f

Scenery only. Wheat fields and hay bales. Paler than sun, which belongs to the UI. Step 500: crop rows and the shaded side of a bale.

straw-700

#b3923a
night #6c6a4c
dawn #987940

Scenery only. Wheat fields and hay bales. Paler than sun, which belongs to the UI. Step 700: the edge of a field and the spiral of a bale.

wall-100

#fff4dc
night #c9c7cf
dawn #b9a07c

Scenery only. Plastered walls. The cream that stands in for white on the ground: scenery never uses the fuselage white. Step 100: the wall in light.

wall-300

#ecd9b4
night #a5a4b3
dawn #b0956d

Scenery only. Plastered walls. The cream that stands in for white on the ground: scenery never uses the fuselage white. Step 300: the shaded end of a wall.

wall-500

#d2ba8e
night #878799
dawn #a5895f

Scenery only. Plastered walls. The cream that stands in for white on the ground: scenery never uses the fuselage white. Step 500: the shadow under the eaves.

tin-100

#f0f4f9
night #b9c1d6
dawn #b2a087

Scenery only. Metal roofs, tanks, silos, parked aircraft. A cool grey, apart from the blue-grey asphalt. Step 100: the brightest band of a curved roof.

tin-300

#dbe2ee
night #a1aac4
dawn #a99983

Scenery only. Metal roofs, tanks, silos, parked aircraft. A cool grey, apart from the blue-grey asphalt. Step 300: the lit tone.

tin-500

#bcc6d8
night #8791af
dawn #9c8e7a

Scenery only. Metal roofs, tanks, silos, parked aircraft. A cool grey, apart from the blue-grey asphalt. Step 500: the shade tone.

tin-700

#98a4bc
night #6b7595
dawn #8c8070

Scenery only. Metal roofs, tanks, silos, parked aircraft. A cool grey, apart from the blue-grey asphalt. Step 700: the deepest shade and roof seams.

tin-900

#6d7994
night #4b5474
dawn #7a6f61

Scenery only. Metal roofs, tanks, silos, parked aircraft. A cool grey, apart from the blue-grey asphalt. Step 900: tinted lines on metal.

hide-100

`#fff6e6`
`night #cfcbd0`
`dawn #b9a180`

Scenery only. Animals. Step 100: a pale coat.

hide-300

`#ead9bc`
`night #a9a6b3`
`dawn #b09570`

Scenery only. Animals. Step 300: the shaded flank and ears.

hide-900

`#4a3528`
`night #3a2f36`
`dawn #6b5439`

Scenery only. Animals. Step 900: patches, hooves and stripes.

denim-300

`#8db4e6`
`night #6f8fc0`
`dawn #888780`

Scenery only. Car paint, a step muted so no car looks like an aircraft livery. Step 300: the roof.

denim-500

`#5f8fcf`
`night #4a6fa8`
`dawn #747877`

Scenery only. Car paint, a step muted so no car looks like an aircraft livery. Step 500: the body.

glass-700

`#5fb2dc`
`night #4d8fc4`

Mullions and the lower rim of glass on buildings: the tinted line of glass.

window

`= glass`
`night #ffe9a8`
`dawn #ffe9a8`

Scenery only. A window of a building: glass by day, a warm light in Night and Dawn.

beacon

`#fff3b0`

Scenery only. Small lamps drawn as part of the ground: runway edge lights, helipad corner lights, headlights, the tower beacon at rest. The same colour as light-beacon.

muzzle

`#f4b3a8`
`night #b98f96`
`dawn #d6a093`

Scenery only. A muzzle, and pink flowers in a meadow or a flower box.

Aircraft and sky objects

fuselage

`#fdfcf5`
`night #f1f3fa`

fuselage-shade

`#d5dbe8`
`night #b4bcd2`

glass

`#9fe0ff`
`night #8fd0ff`

glass-shine

`#ffffff`

prop-blur

`rgba(29, 37, 69, 0.3)`
`night rgba(223, 230, 245,`

cloud

`#ffffff`
`night #a9b5d6`

Aircraft body white.

Engines, nacelles and the shaded side of the fuselage.

Cockpit windows. Keep them big.

The single highlight streak on a cockpit window.

0.3)
Translucent disc of a spinning rotor.

dawn #d9b8c4
Ambient drifting clouds above the field, drawn at opacity-cloud.

cloud-shade

`#d6ebfa`
`night #7f8cb3`
`dawn #a98ca8`
Underside of clouds.

select-ring

`#ffffff`
`night #ffe98a`
Dashed ring around the selected aircraft. Always drawn over an outline-coloured casing, like the flight path.

zone-ok

`= success`
Glow on a runway or helipad while the path end is a valid landing.

zone-no

`= cherry`
Glow on a landing zone of the wrong type for the selected aircraft.

star

`#ffe066`
Star burst on a safe landing; streak sparkles.

poof

`#f7f8fc`
`night #dfe4f2`
Comic poof cloud on a collision.

poof-shade

`#c8d1e6`
`night #9aa5c4`
Shaded lobes of the poof.

Depth

shadow-ground

`rgba(24, 40, 30, 0.28)`
`night rgba(4, 7, 18, 0.5)`

shadow-cast

`#12301f`
`night #03050f`

scrim

`rgba(17, 24, 58, 0.55)`
`night rgba(3, 5, 16, 0.7)`

contact

`rgba(29, 37, 69, 0.2)`
`night rgba(4, 7, 18, 0.4)`

contact-field

`rgba(18, 48, 31, 0.28)`
`night rgba(3, 5, 15,`

contact-overlay

`rgba(10, 14, 36, 0.3)`
`night rgba(3, 5, 16, 0.5)`

dawn rgba(20, 22, 30, 0.353)
The soft shadow an aircraft or cloud casts on the ground.

dawn #14161e
The hard shadow anything standing on the ground casts down-right. Drawn as one layer at opacity-shadow-cast, so overlapping shadows never darken twice.

Dims the field behind the pause and game-over dialogs.

The flat contact shadow under a control, panel or card on a menu.

0.45)
The flat contact shadow under anything in the HUD: flight strips, stickers, the pause button, coach marks.

The flat contact shadow under a dialog on the scrim.

blackout

`#03050f`

Opaque near-black navy that the game screen fades to after a collision, leaving only the two colliding aircraft. Same in Day and Night.

Sunset (splash page only)

sunset-sky-top

`#a82a2a`

Splash page only. Top band of the sunset sky: the deepest, reddest orange.

sunset-sky-upper

`#d4481f`

Splash page only. Second band of the sunset sky.

sunset-sky-lower

`#f0731f`

Splash page only. Third band of the sunset sky.

sunset-sky-horizon

`#ffa23a`

Splash page only. Glowing band at the horizon, behind the airport silhouette.

sunset-sun

`#ffe08a`

Splash page only. The low sun, partly behind the silhouette, on sunset-sky-lower and sunset-sky-horizon.

sunset-silhouette

`#2a1630`

Splash page only. The airport silhouette and the ground it stands on. A dark plum, not black.

sunset-tower-light

`#ffe9a8`

Splash page only. The lit window of the control tower cab, on sunset-silhouette.

Lights (Dawn levels only)

light-nav-red

`#ff4d4d`

Dawn levels only. The red navigation light on the left wingtip of an airborne airplane.

light-nav-green

`#3ddc84`

Dawn levels only. The green navigation light on the right wingtip of an airborne airplane.

light-white

`#ffffff`

Dawn levels only. The white tail light of an airborne airplane.

light-beacon

`#fff3b0`

Dawn levels only. The flashing beacon on top of the control tower, and the landing light on the nose of an airborne airplane.

light-agl

`#ffe9a8`

Dawn levels only. Airfield ground lights: the runway lights and the running light that sweeps along a runway.

FOUNDATIONS

Type

DynaPuff for display type, titles, button labels and scores. Nunito for running text, never lighter than 600. Inconsolata for labels, readouts and callsigns, never lighter than 700: it is the voice of the tower.

Display · DynaPuff

Final Approach

display-xl · 72px/68px · 700 · The game title on the splash and main menu only.

Game over

display-lg · 48px/48px · 700 · Dialog headlines: Paused, Game over, Cleared to land.

Nice landing!

display-md · 36px/40px · 700 · Screen titles and the final score.

12 450

score · 32px/32px · 700 · The live score in the HUD and score popups. Thin space as thousands separator.

12 450

score-compact · 24px/24px · 700 · The compact Score Counter in the HUD: the best score. Thin space as thousands separator.

12 450

strip-value · 21px/24px · 700 · The value in a flight strip and in a stat cell. Thin space as thousands separator.

Paused

dialog-title · 38px/40px · 700 · The title in the header band of a dialog.

Paused

dialog-title-compact · 32px/36px · 700 · The title of a dialog in its compact, landscape layout.

Titles · DynaPuff

Choose an airport

title-lg · 28px/32px · 600 · Section headings in menus.

Meadow Field

title-md · 22px/28px · 600 · Card titles, level names.

Sound effects

title-sm · 18px/24px · 600 · Settings rows, small headings.

Play

button-label-lg · 24px/28px · 700 · Label of the large button: the main call to action on a menu.

Take off

button-label · 18px/20px · 600 · Labels of medium buttons.

Retry

button-label-sm · 15px/18px · 600 · Labels of small buttons, segments and chips.

Text · Nunito

Tap an aircraft, then drag to draw its path.

body-lg · 18px/28px · 600 · Tutorial copy and dialog lead text.

Tap an aircraft to select it.

row · 15px/20px · 700 · A row in a panel or a settings list, and the text of a coach mark.

Planes land on runways. Helicopters land on helipads.

body · 16px/24px · 600 · All running text. Nunito, never lighter than 600: thin strokes look weak beside the outlines.

Two aircraft got too close.

body-sm · 14px/20px · 600 · Supporting text in cards and toasts.

Best 18 200

caption · 12px/16px · 700 · Metadata under titles.

Readouts · Inconsolata

x3 STREAK

readout · 20px/24px · 800 · Numbers that change while you watch: streak multiplier, countdowns, stats.

NEXT UP

label · 13px/16px · 800 · Uppercase eyebrow labels above HUD values and settings groups. Write them in capitals.

FA 204

callsign · 12px/14px · 800 · The tag that follows a selected aircraft. Uppercase letters and digits.

SCORE

label-sm · 11.5px/14px · 800 · The label cell of a flight strip, the label of a stat cell, the eyebrow of a dialog and the text of a stamp. Write it in capitals.

FOUNDATIONS

Shape and depth

A 4px spacing grid, five line ranks, nested radii, and depth from a lip and a flat contact shadow. Nothing in the UI is blurred.

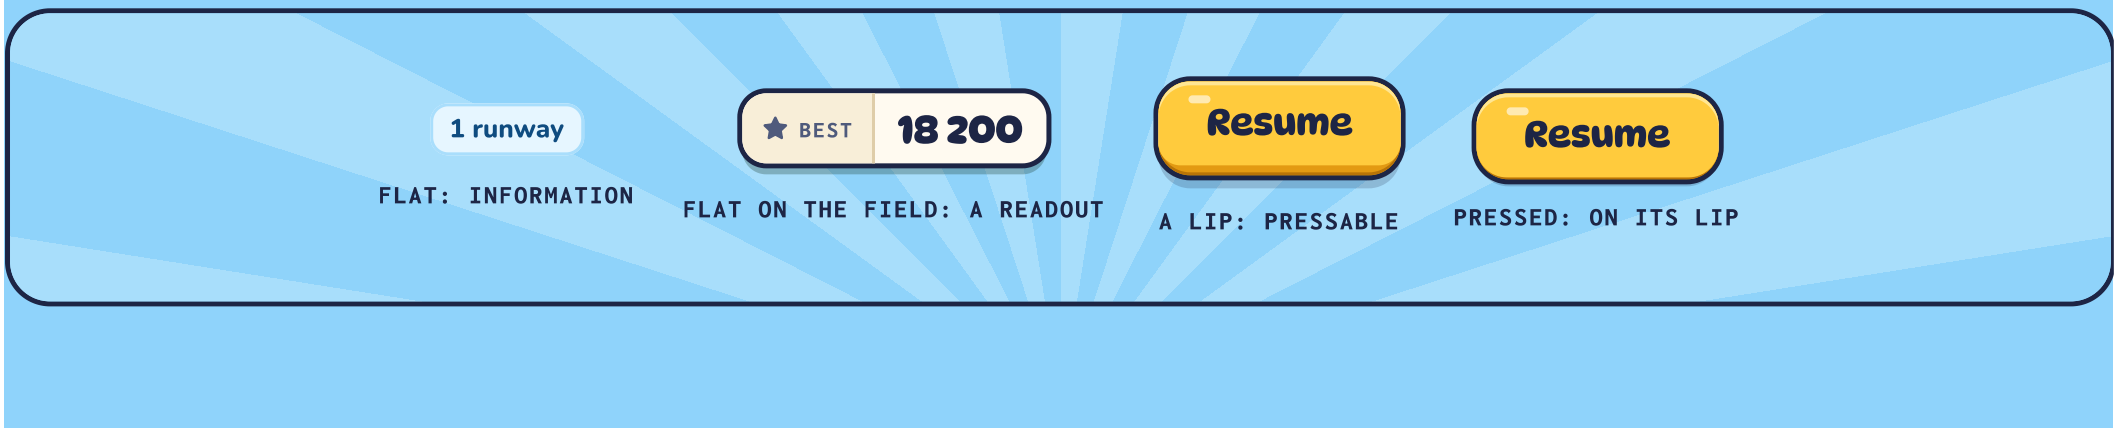

Line ranks

TOKEN	VALUE	WEIGHT	USE
line-hero	4px		Rank 1. The outline of an aircraft, and of nothing else.
line-zone	3px		Rank 2. The outline of a runway, a helipad and a cloud.
line-ui	2.5px		Rank 3. The outline of every control, panel, flight strip and dialog, and the silhouette of scenery.
line-ui-sm	2px		Rank 4. Small parts: the selected segment, a heart, a chimney, a post.
line-detail	1.25px		Rank 5. Lines inside a shape: keylines, dividers, tile joints, mullions. Always a darker tone of the surface, never outline. Scenery may go up to 1.5.

Depth: lips and contact shadows

TOKEN	VALUE	USE
lip-sm	4px	Lip of a small button and of the HUD pause button.

TOKEN	VALUE	USE
lip-md	5px	Lip of a default button and of an icon button.
lip-lg	7px	Lip of the large button.
lip-panel	6px	Lip of a panel and of a level card.
lip-dialog	8px	Lip of a dialog.
lip-pressed	1px	What is left of a lip while its control is pressed. The face moves down by the difference.
lip-inset	3.5px	The lip drawn inside a small round part: the toggle knob, the selected segment.
lip-edge	1.5px	The darker line along the bottom of a lip.
highlight	2px	The lighter line along the top edge of a face.
well-inset	3px	The inner top edge of a well: toggle track, segmented trough.
contact-offset	4px	How far the flat contact shadow shows below a control or panel.
contact-offset-field	3px	How far the contact shadow shows below a flight strip, sticker or coach mark.
contact-offset-overlay	7.5px	How far the contact shadow shows below a dialog.

TOKEN	VALUE	CORNER	USE
radius-chip	9px		Chips and tags.
radius-strip	12px		Flight strips, the pause button, icon tiles, the selected segment.
radius-control-sm	13px		Small buttons.
radius-control	16px		Buttons, icon buttons, the segmented trough, coach marks.
radius-control-lg	21px		The large button.
radius-panel	20px		Panels and level cards.
radius-dialog	26px		Dialogs.
radius-pill	999px		Toggles, the streak badge, score popups, path dash caps.

TOKEN	VALUE	SCALE	USE
space-1	4px		Gap between an icon and its label; hearts in the lives meter.
space-2	8px		Inner padding of chips and HUD pills; gap between segments.
space-3	12px		Gap between HUD items; small button padding.
space-4	16px		HUD inset from the screen edge; card padding; default gap.
space-5	24px		Panel padding; gap between dialog buttons and copy.
space-6	32px		Dialog padding; gap between menu sections.
space-7	48px		Vertical rhythm on the main menu.
space-8	64px		Title block offset on splash and game over.

Flight path and rings

TOKEN	VALUE	USE
path-stroke	3px	Width of the coloured flight path dash.
path-casing	7px	Width of the outline-coloured casing drawn under the flight path.
path-dash	10px	Dash length of the flight path.
path-gap	8px	Gap between flight path dashes.

TOKEN	VALUE	USE
path-dot	12px	Diameter of the end dot of a flight path.
warn-ring-dash	10px	Dash length of the proximity warning ring.
warn-ring-gap	8px	Gap between proximity warning ring dashes.

Sizes

TOKEN	VALUE	USE
touch-min	48px	Minimum touch target for any control.
touch-aircraft	72px	Minimum pick diameter around an aircraft, however small it is drawn.
button-sm	40px	Height of small buttons (48px touch target with its margin).
button-md	52px	Height of default buttons.
button-lg	64px	Height of the main menu call to action.
coach-max-width	300px	Maximum width of a gesture or tracking coach mark.
coach-explain-max-width	360px	Maximum width of an explanation coach mark.
highlight-margin	12px	Gap between a landing-zone highlight outline and the runway or helipad it surrounds (space-3).
icon-sm	20px	Icons inside chips and small buttons.
icon-md	28px	Icons inside buttons and HUD chips.
icon-lg	40px	Icons in coach marks and empty states.

TOKEN	VALUE	USE
sprite-light-prop	56px	Drawn size of the light prop at 1x viewport scale.
sprite-helicopter	64px	Drawn size of the helicopter, rotor disc included.
sprite-turboprop	68px	Drawn size of the turboprop.
sprite-jet	72px	Drawn size of the jet.
sprite-jumbo	104px	Drawn size of the jumbo. Exaggerated on purpose.
sprite-light-prop-side	116px	Length, nose to tail, of the side-view light prop that tows the banner on the splash page.
tow-line	44px	Length of the tow line between the side-view airplane and the banner.
warn-ring-margin	10px	Gap between an aircraft's collision outline and its proximity warning ring.
level-tile	168px	Side of the square level card on the level select page.
level-tile-art	120px	Height of the layout miniature inside a square level card.
dialog-max-width	400px	Widest the Dialog gets in its default, portrait layout.
dialog-compact-max-width	720px	Widest the compact (landscape) Dialog gets.
dialog-compact-breakpoint	600px	A Dialog uses its compact layout when the space inside the system bars is wider than tall and less high than this.
strip-height	40px	Height of a flight strip and of the pause button in the HUD.
shine-width	11px	Width of the shine on a coloured button.
shine-height	4px	Height of the shine on a coloured button.
shine-inset-x	15px	Distance of the shine from the left edge of the face.
shine-inset-y	7px	Distance of the shine from the top edge of the face.

TOKEN	VALUE	USE
sticker-rim	3px	Width of the paper rim around a sticker.
sticker-height	32px	Height of a sticker: the streak badge and the score popup.
chip-height	26px	Height of a chip.
icon-tile	36px	Side of the tinted tile behind an icon in a panel row.
icon-xs	15px	Icons inside a flight-strip label and a chip.
perforation-dot	14px	Diameter of the punched half-holes where a perforation meets the edge of a dialog.
toggle-width-v2	60px	Width of the v2 toggle track.
toggle-height-v2	34px	Height of the v2 toggle track (the touch area is touch-min).
toggle-knob-v2	26px	Diameter of the v2 toggle knob.
segment-height	36px	Height of a segment of a segmented control (the touch area is touch-min).
shadow-air-blur	5px	Blur of the soft shadow under an aircraft, in world units of a scene.
shadow-cloud-blur	7px	Blur of the soft shadow under a cloud, in world units of a scene.
rule-dash	6px	Dash length of a dashed rule on paper: the perforation of a dialog, the rule under a panel header.
rule-gap	4px	Gap between the dashes of a dashed rule on paper.

Opacity

TOKEN	VALUE	USE
opacity-cloud	0.85	Ambient clouds, so aircraft stay readable beneath them.
opacity-path-idle	0.7	Paths of aircraft that are not selected.
opacity-ghost	0.5	The straight-on projection drawn past a path end.
light-max-opacity	0.6	The brightest any Dawn light may get: light is a gentle glow, never a flash.
descent-scale-end	0.6	A helicopter in its landing sequence shrinks from full size to this fraction of its sprite while it descends onto its shadow. Not an opacity; kept here with the other unitless factors.
opacity-shadow-cast	0.32	The one layer that holds every hard ground shadow is drawn at this opacity.
opacity-shine	0.6	The shine on a coloured button.
opacity-eyebrow	0.75	The eyebrow label in the header band of a dialog.
opacity-shadow-air	0.26	The soft shadow under an aircraft in a scene.
opacity-shadow-cloud	0.2	The soft shadow under a cloud in a scene.

Layers

TOKEN	VALUE	WHAT IS ON IT
z-field	0	Lawn, runways, helipads, ground decoration.
z-zone	10	Landing zone glows.
z-path	20	Flight paths and end dots.
z-ground-shadow	30	Aircraft shadows, all below every aircraft.
z-aircraft	40	Aircraft, selection ring, callsign tag.
z-fx	50	Star bursts, poofs, score popups.
z-clouds	60	Ambient clouds.
z-hud	70	HUD and coach marks.
z-overlay	80	Scrim and dialogs.

BRAND

App icon

The sun-yellow jet in close-up, lined up over a runway. Built only from system parts: the game's jet sprite at `line-hero`, its soft shadow, and the v2 runway on the mown lawn.

In-app and web: `app-icon-rounded.svg`

Android, circle mask

Android, squircle mask

iOS mask

96, 64 and 40px: the smallest size

ASSETS

Icons

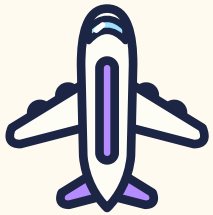

22 glyphs on a 24px grid with 3px round strokes. They take the text colour.

ASSETS

Aircraft

Five flying toys on a 96-unit square. Drawn size grows with how hard each is to handle.

SPRITE	TYPE	SPEED	TURN RATE	LANDS ON	DRAWN SIZE
	**Light prop**	Slow	High	Runway	**56px**
	**Turboprop**	Medium	Medium	Runway	**68px**
	**Jet**	Fast	Low	Runway	**72px**
	**Jumbo**	Medium-fast	Very low	Runway	**104px**
	**Helicopter**	Slow	Very high	Helipad	**64px**

ASSETS

Scenery

Everything on the ground that is not a landing zone, drawn on the nine world rules. Standing things show a south wall and never rotate; things that move are strictly top-down. Each sprite carries a height tier and the silhouette of its cast shadow.

- Silhouette in `outline` at `line-ui`; inner lines in the material's 700 or 900 step at `line-detail`. An aircraft keeps `line-hero`.
- At most three materials in one sprite, each in flat tones of its ramp. Glass, lamps and small trims do not count as a material.
- Never `fuselage`, a path colour or `sun-500`. Whites are `wall-100` or `hide-100`. Only the tower cab (`cherry`) and the windsock (`tangerine`) keep an accent.
- Height tiers: S throws its shadow 3 by 4 units, M 12 by 14, L 11 by 13 from a raised crown. All hard shadows share one layer in `shadow-cast` at `opacity-shadow-cast`.
- Windows take `window`: glass by day, a warm light in Night and Dawn.
- Scenery never covers a runway, a helipad or a landing zone, and only flat ground lies under the HUD band.

Day, at twice world size

ASSETS

Ground and landing zones

Flat ground has no navy line and never meets another material on a bare edge. Runways and helipads keep their v1 footprint and are the only ground shapes outlined, at `line-zone`.

Runway. Shoulder and rough-grass fringe, threshold bars, aiming blocks, touchdown marks, tyre rubber, edge lights, green threshold lights and four approach lights.

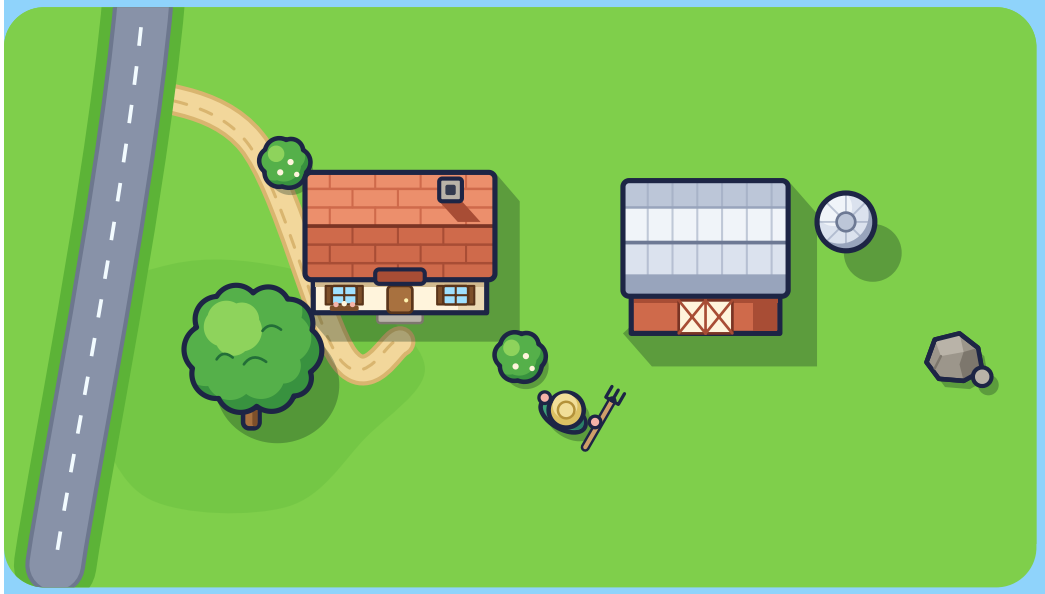

Helipad and taxiway. A concrete pad with slab joints and corner lights. Taxiways are a lighter asphalt with a yellow centre line and a hold-short bar.

Apron. Slab joints and stand marks are tinted. Buildings stand on their south walls; parked aircraft are metal, with no livery.

Water and woods. Open water, shallows, sand, damp grass. Trees overlap north to south. The meadow is not striped.

Farm. A road with kerb and verge, a dirt track, crop fields edged in their own tone, a hedge with one shared outline.

Shore. Sand, shallows and a line of foam; a jetty, a sailboat and its wake.

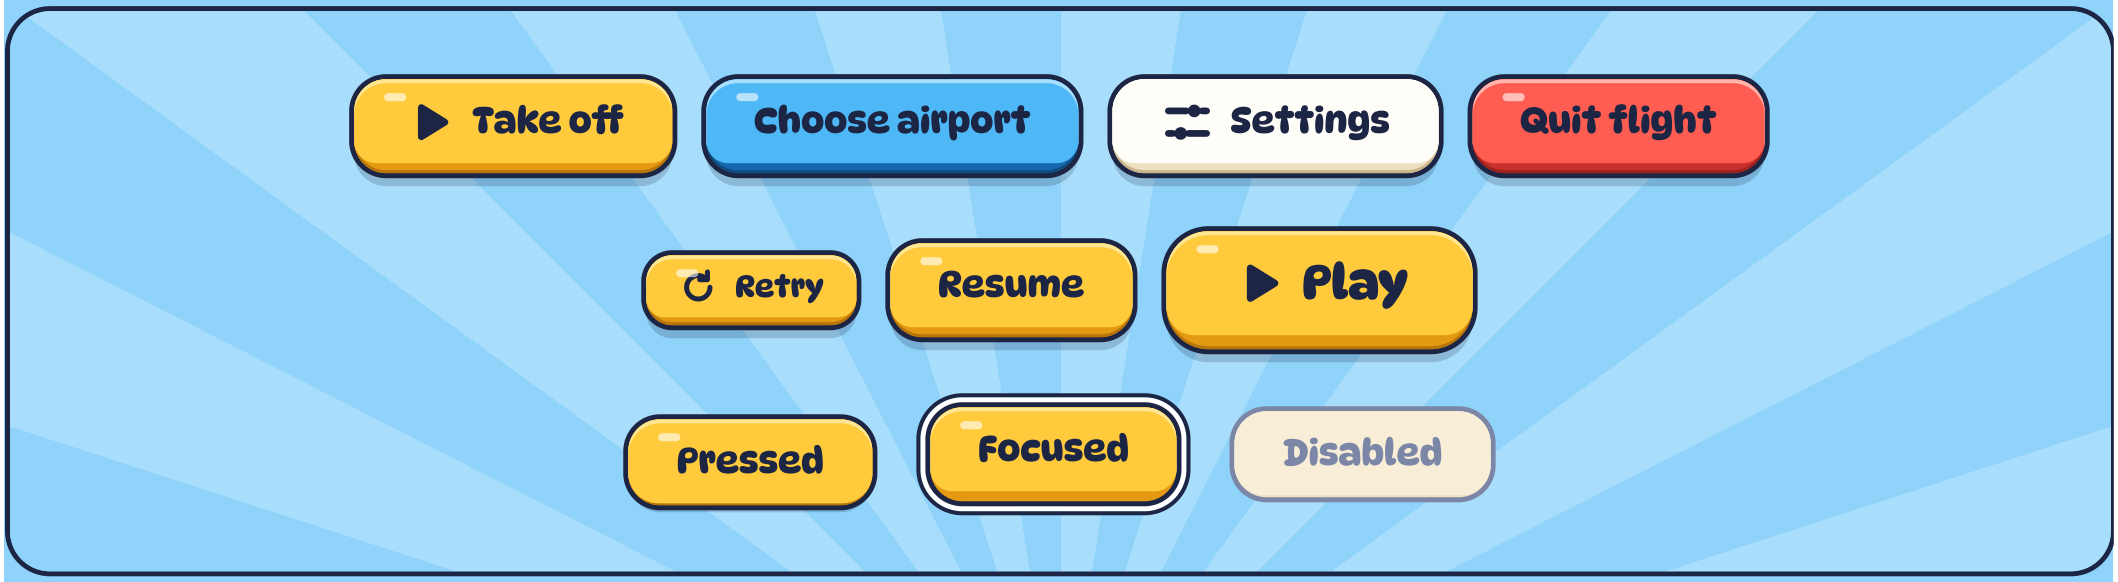

COMPONENTS

Components

Every component lives in `bundle.css` under an `fa-` class and reads only tokens.
Guidelines are in `components/`.

Button

The moulded button for every text action in menus and dialogs.

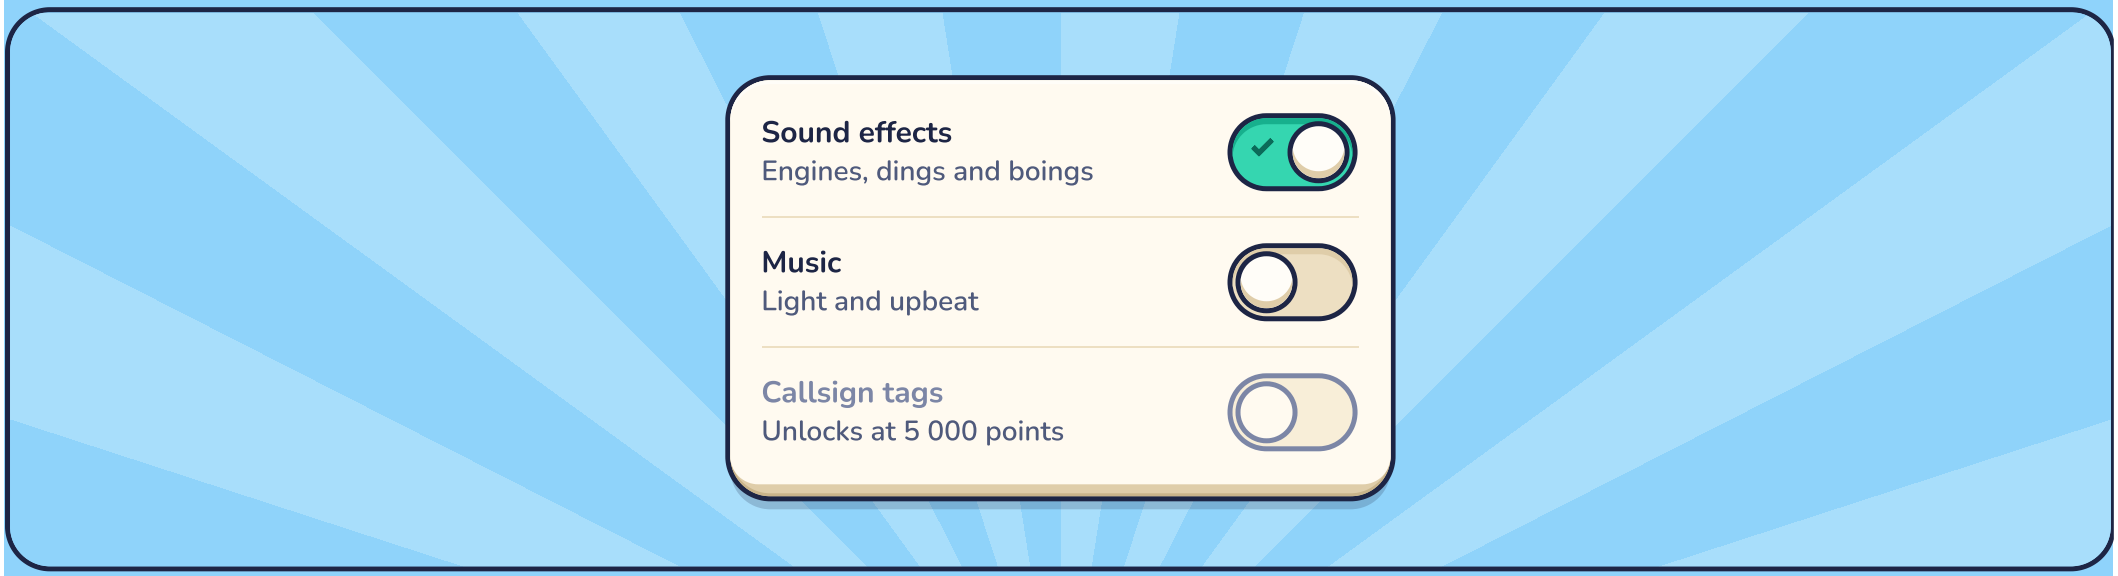

Icon Button

A square moulded button that carries one icon and no text: pause in the HUD, close and back in menus.

Toggle

An on/off switch for settings that apply immediately.

Segmented Control

A row of two to four mutually exclusive choices, one always selected.

DIFFICULTY

Cadet | Controller | Chief

A collision costs one life. More aircraft, more types.

Chip

A flat, tinted tag that names a property: landing zones, a best score, a lock reason, a status.
Never pressable.

1 runway · 1 helipad · Best 18 200 · Landed · Too close · Streak · Locked

Flight Strip

The flat HUD readout: an optional labelled cell and a value. It replaces the v1 HUD chip.

BEST 18 200 · SCORE 12 450 · 3:20 · NEXT

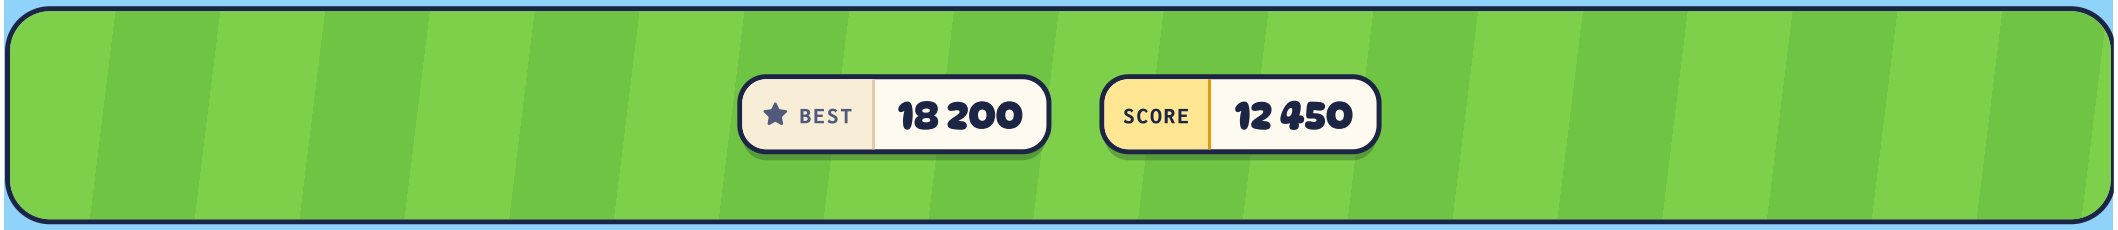

Hud Bar

The gameplay overlay: best score, score and streak on the left; next aircraft, lives and pause on the right. Pause is its only control.

Score Counter

The best score and the live score, each in a flight strip. A star marks the best; the live score has the sun label cell.

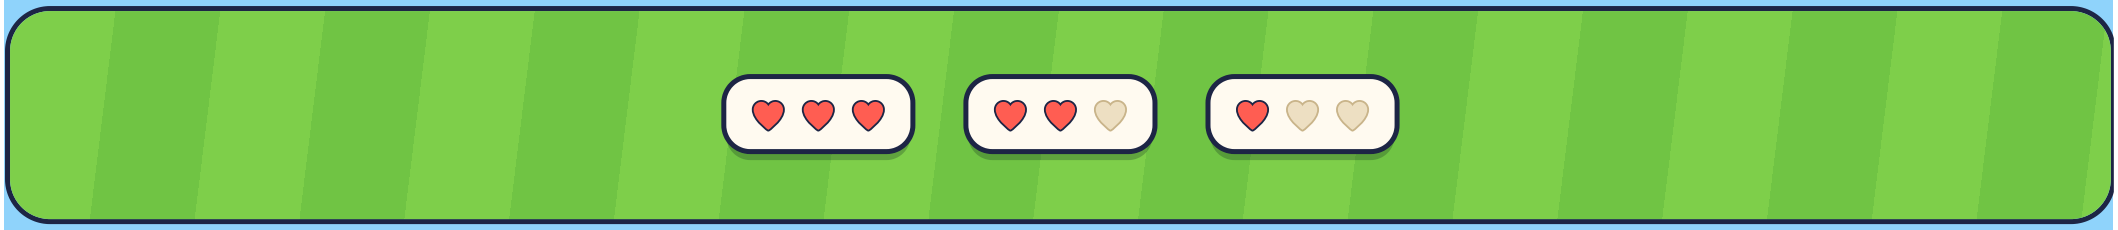

Spawn Counter

How many aircraft of one type have spawned in the running level, in a flight strip.

Lives Meter

Remaining lives as a row of hearts in a flight strip. A lost life is a paper heart.

Next Aircraft Hint

A flight strip that previews the next aircraft and the edge it will enter from.

Sticker: Streak Badge and Score Popup

The celebratory pills: tilted, with a paper rim. They are the only tilted shapes, and they are flat.

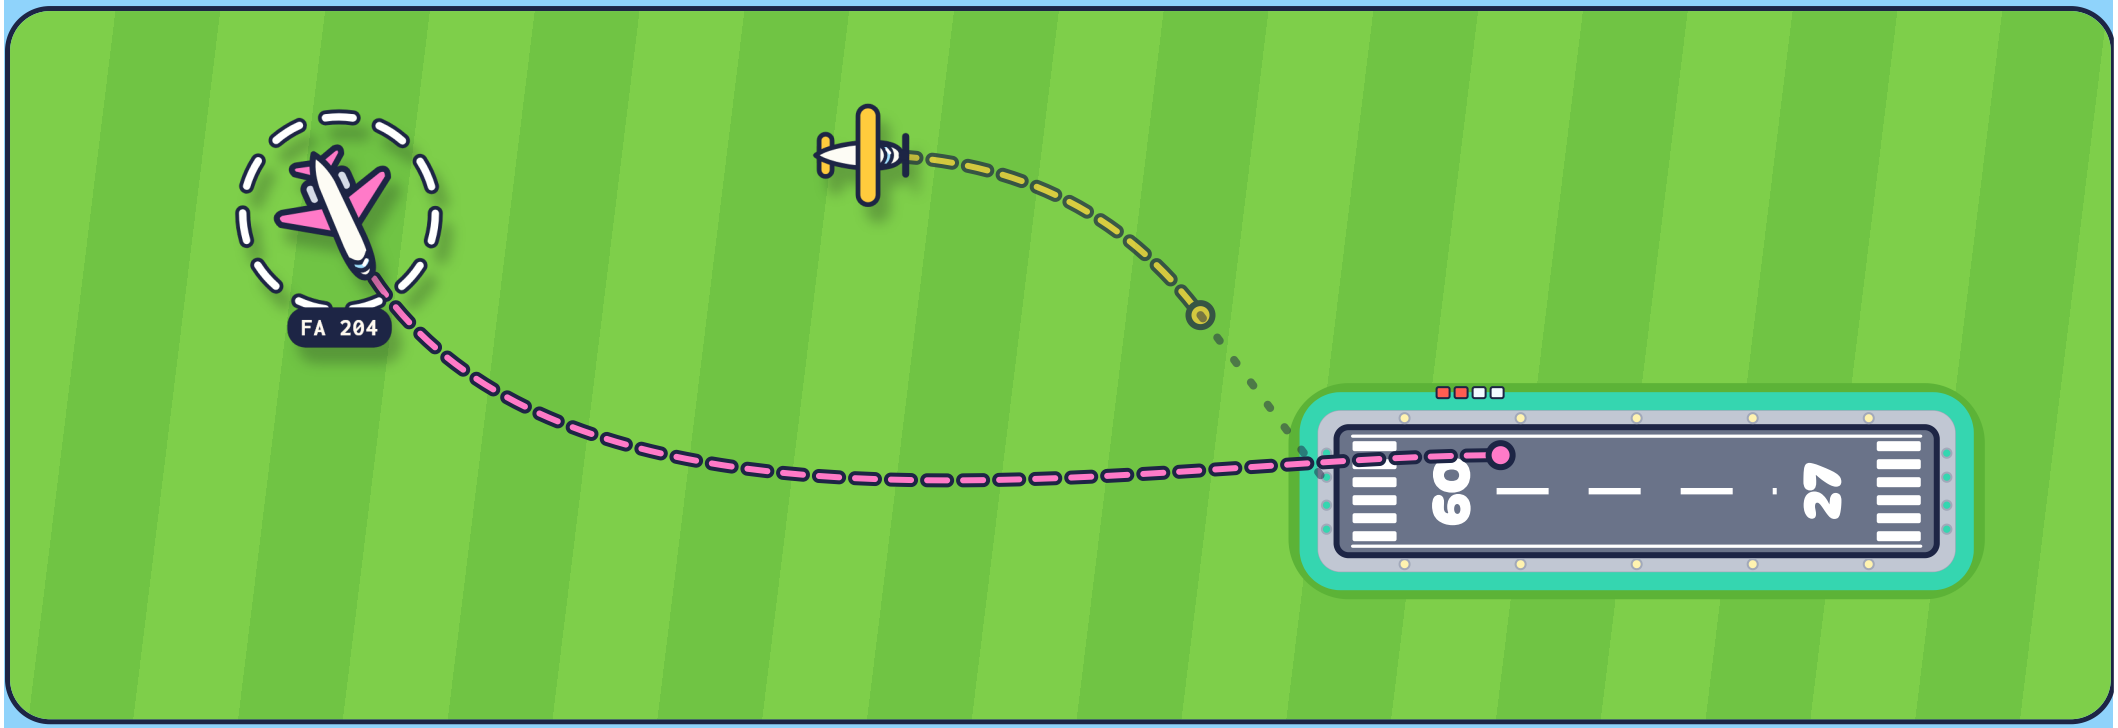

Aircraft

The five flying toys, drawn top-down with the nose pointing up at heading 0.

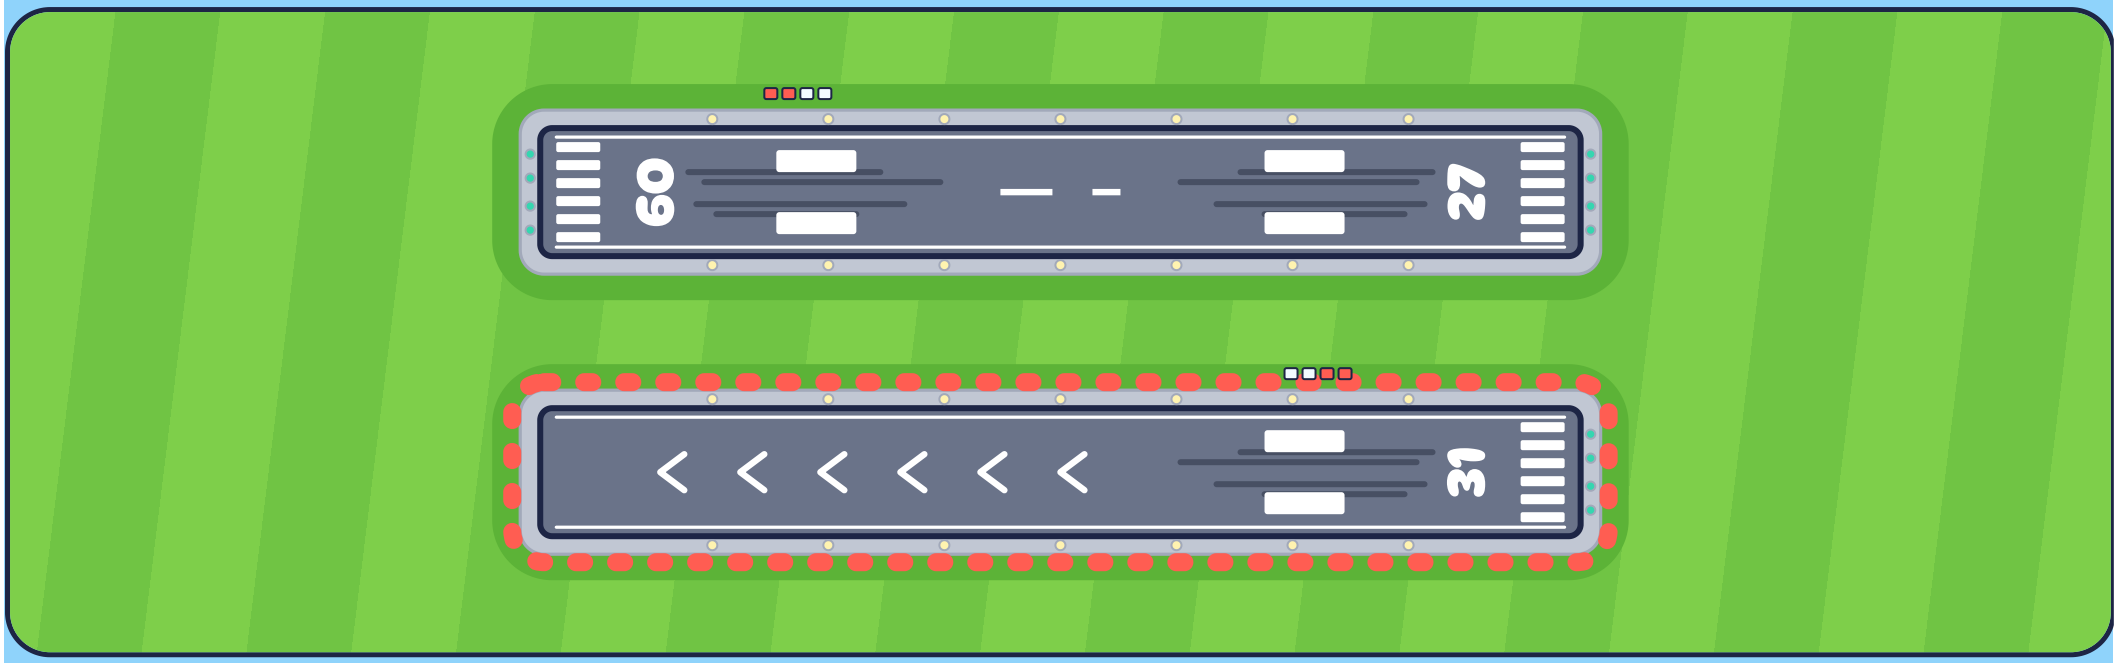

Flight Path

The dashed line a player draws from an aircraft to where it should go.

Runway

A landing strip for airplanes, defined by position, heading, length and its two numbers. See Ground and landing zones.

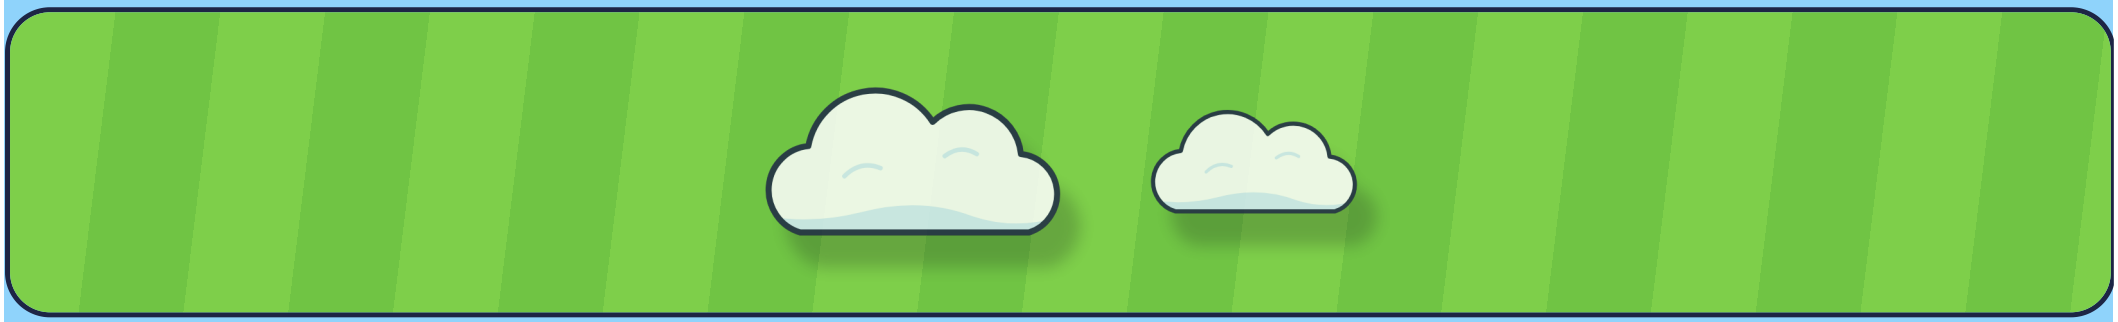

Helipad

A round landing spot for helicopters on a concrete pad.

Cloud

An ambient cloud that drifts across the field above the aircraft. Airborne: it keeps the soft shadow.

Windsock

A striped windsock on a pole beside the runway.

Effects

The three feedback animations that tell the player what just happened.

✓ Star burst: safe landing

⚠ Poof: collision

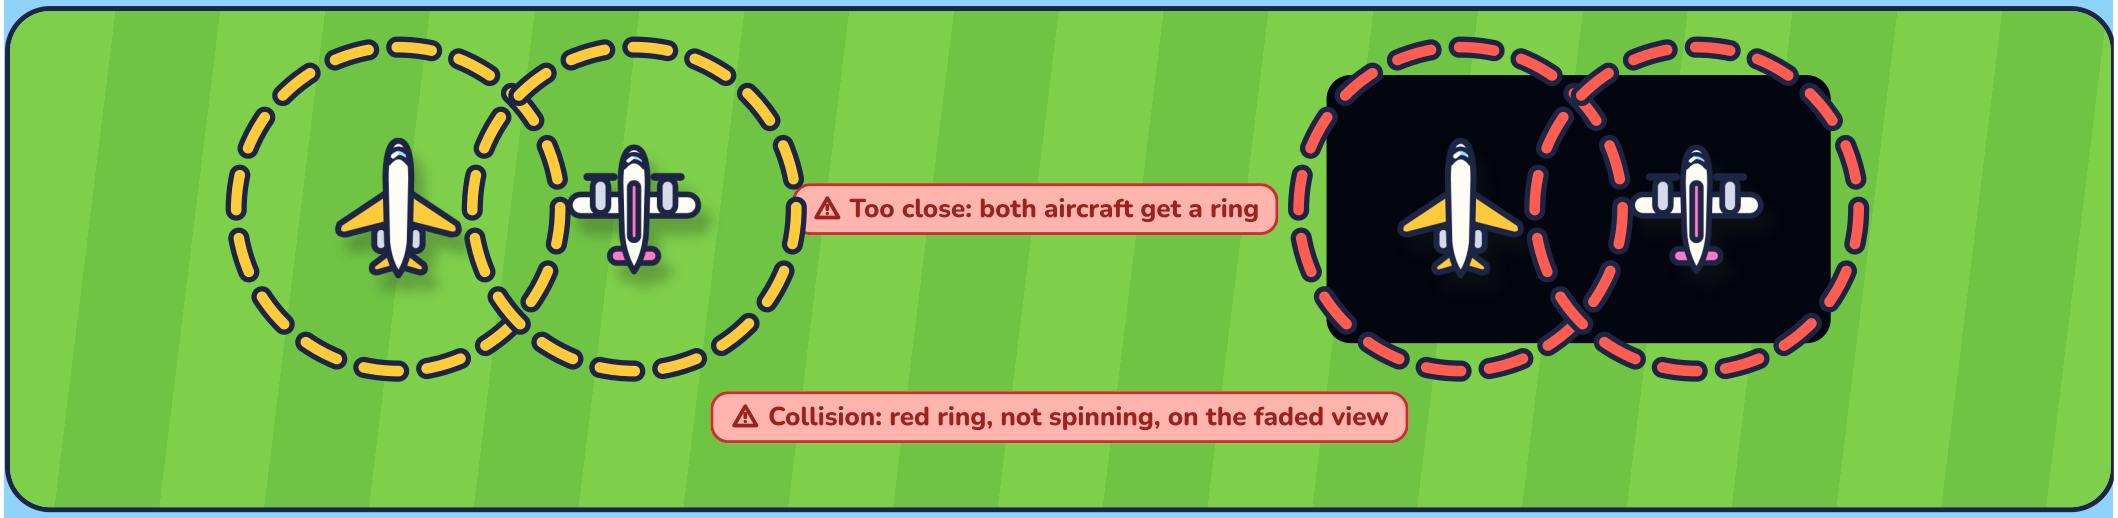

Squash and stretch: touchdown

Bank: turning

Proximity ring

A slowly spinning dashed red ring around every aircraft that is too close to another one. A warning, not a failure: they have not touched yet.

Panel

A paper container for grouped content in menus, with an optional header band.

How to play

3 steps

Tap an aircraft to select it.

Drag to a runway. Airplanes need to line up with it.

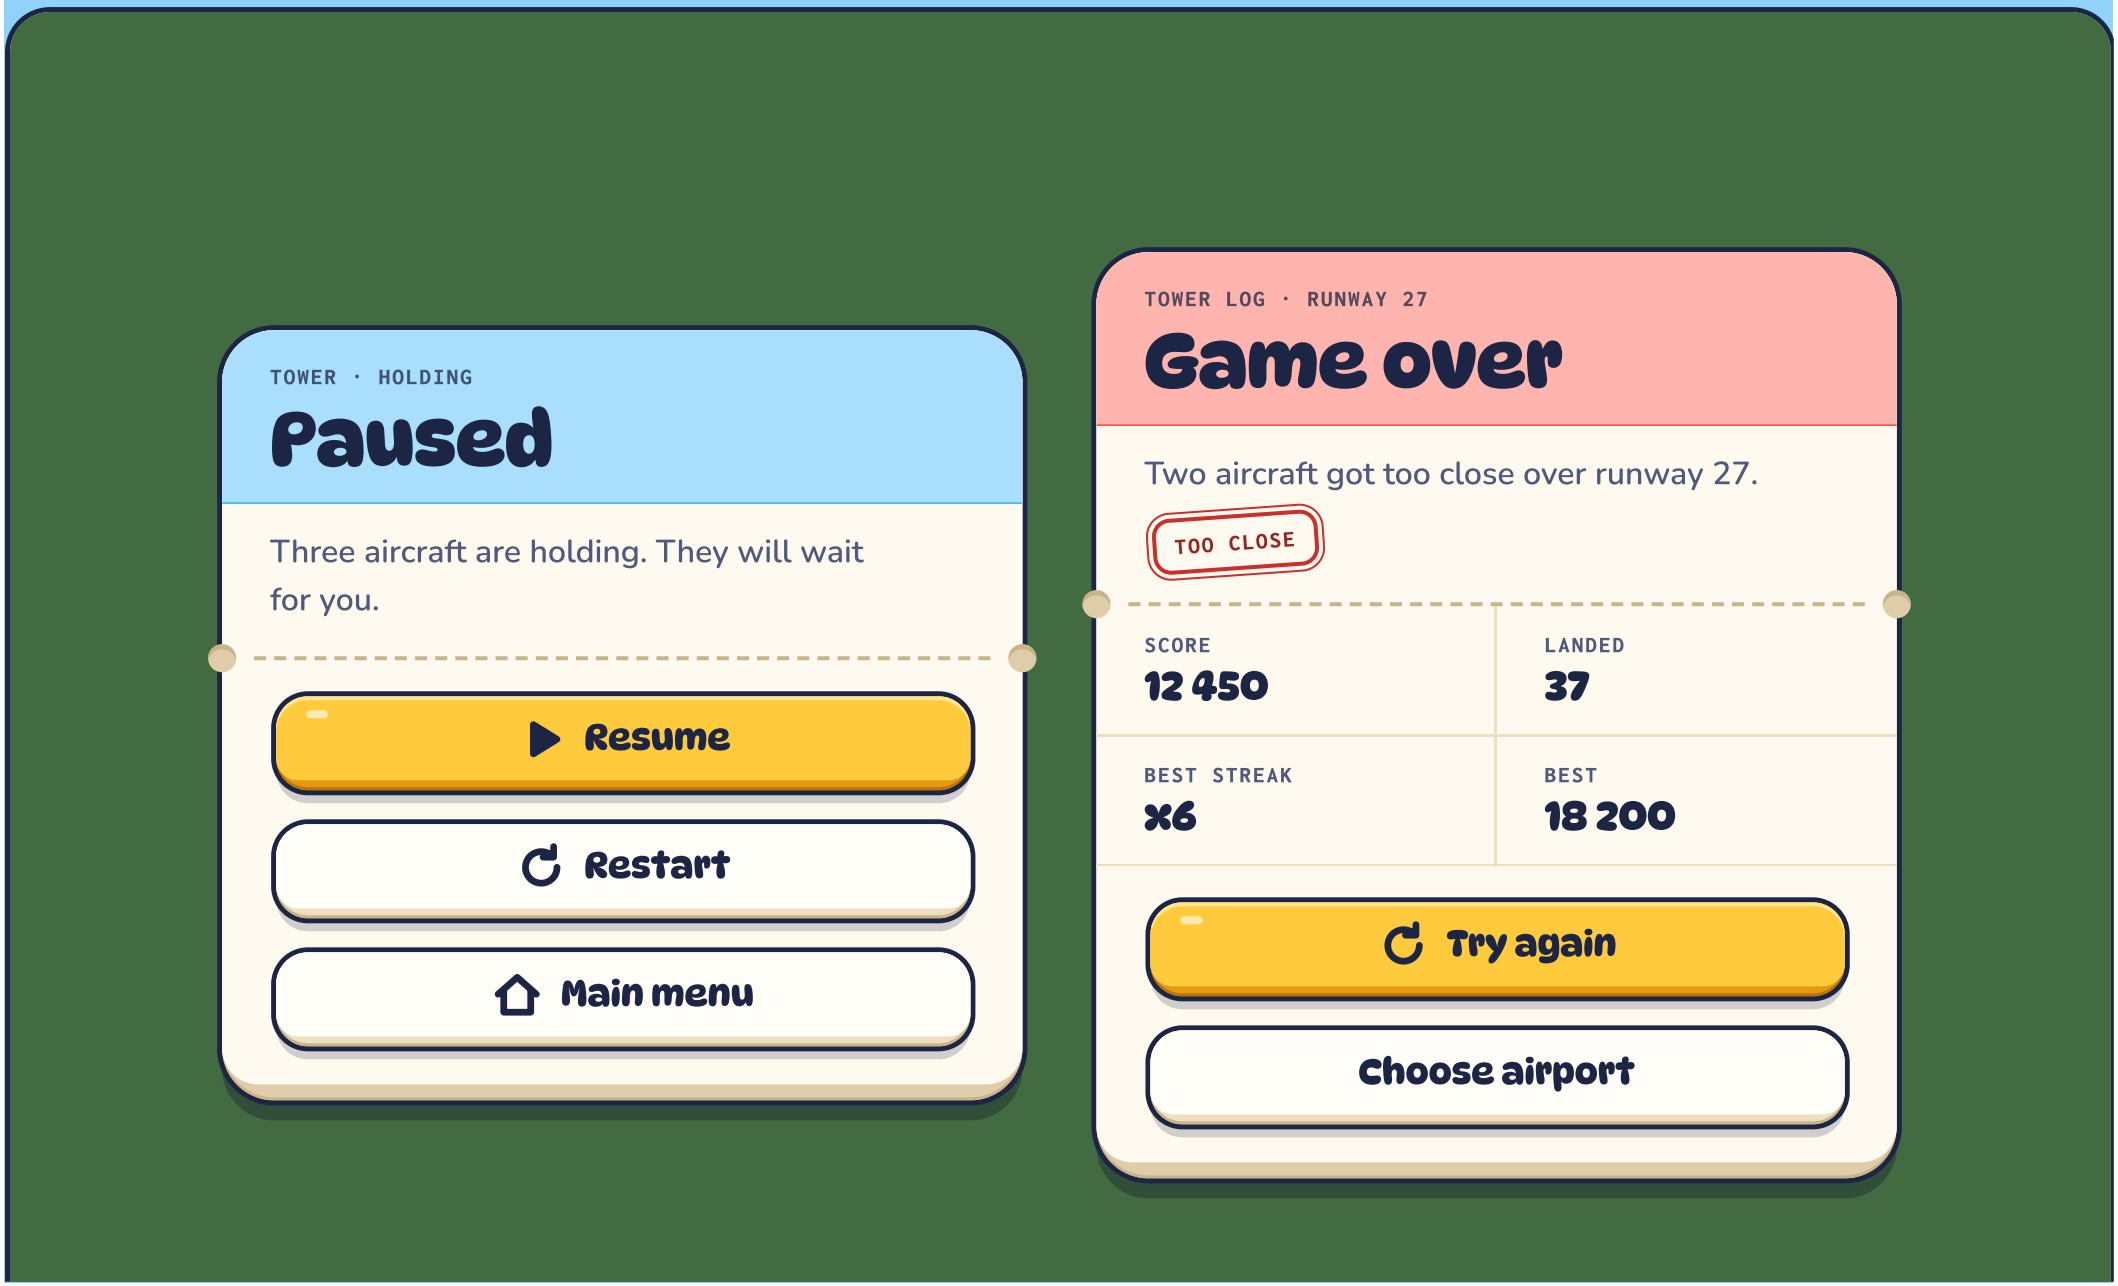

Helicopters land on the H.

Meadow Field

One runway and a helipad between a farm and a pond.

Dialog

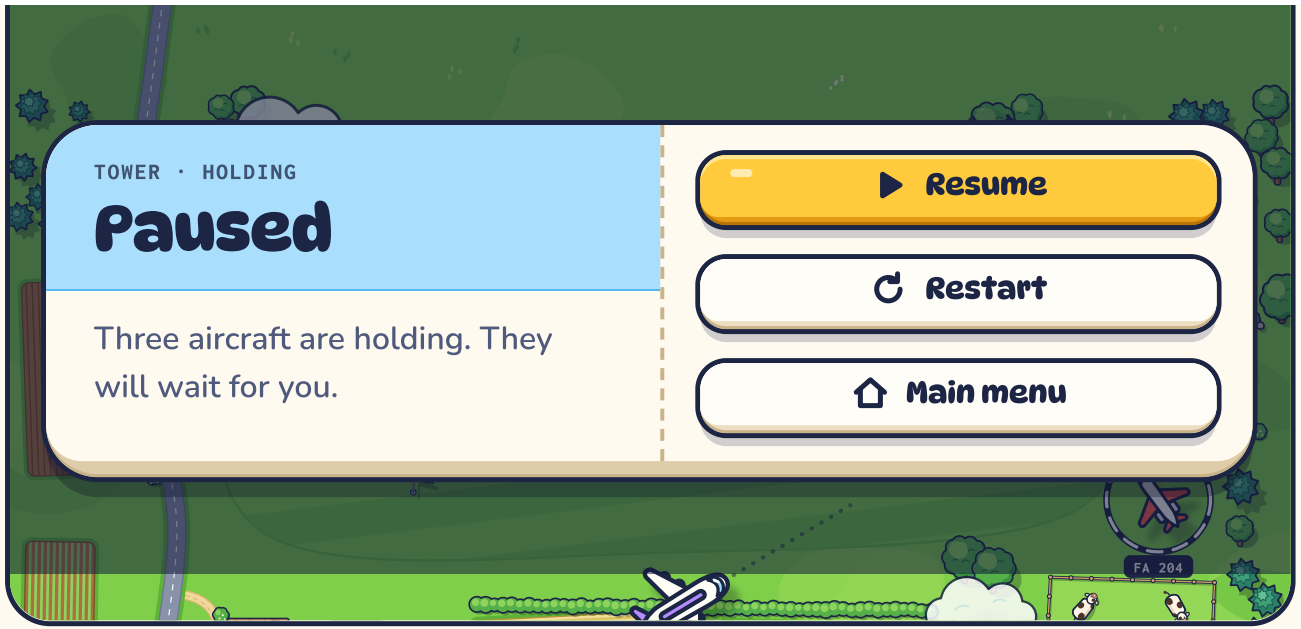

A modal that stops the game, built as a boarding pass: a tinted header, the message, a perforation, and a stub with stats and actions.

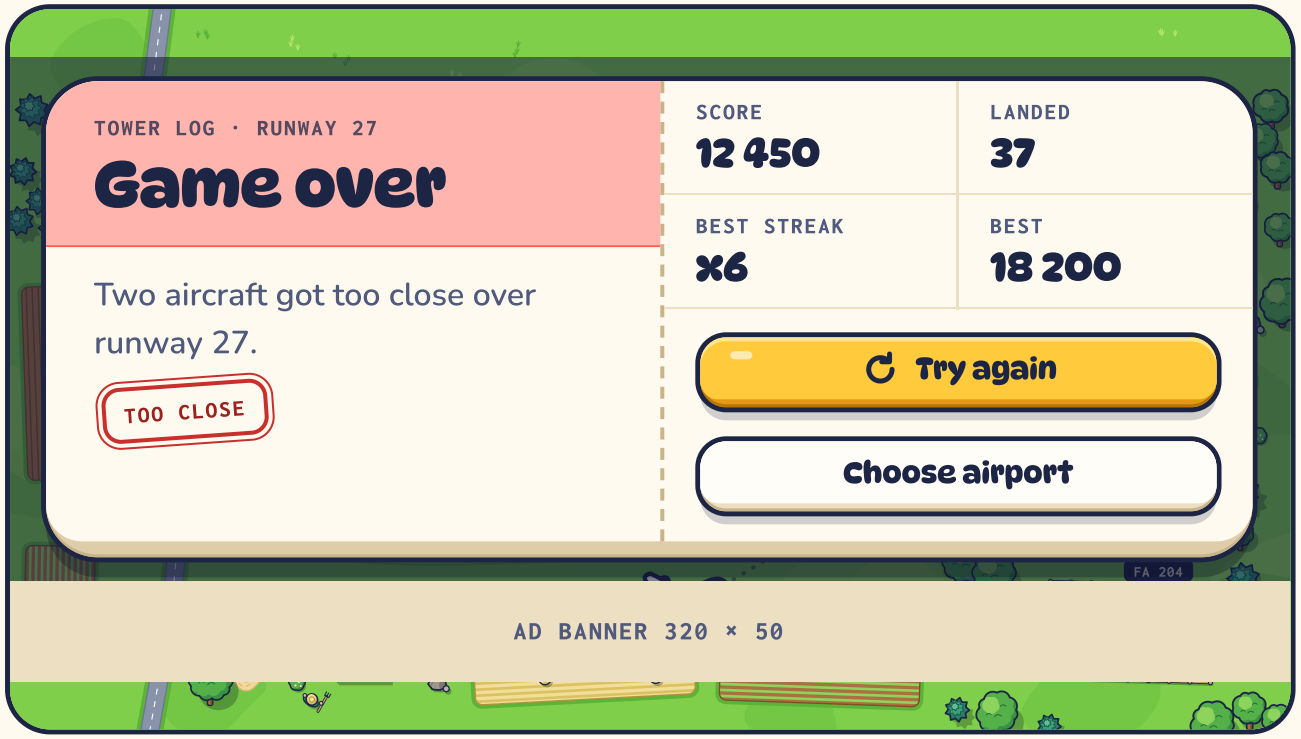

Compact variant, on a 640 by 360 landscape phone with its system bars (24px top and bottom) and a 50px banner under the game-over dialog. The pass tears along a vertical perforation.

Focused

1 runway

Coach Mark

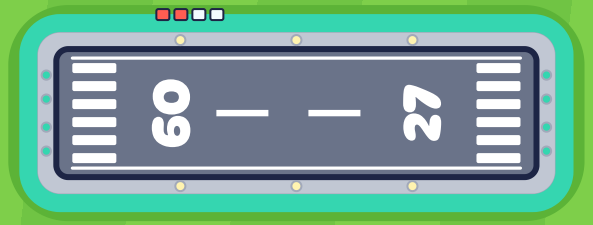

A dark speech bubble that teaches one gesture at a time.

STEP 1 OF 2

Tap an aircraft

It gets a ring when it is yours.

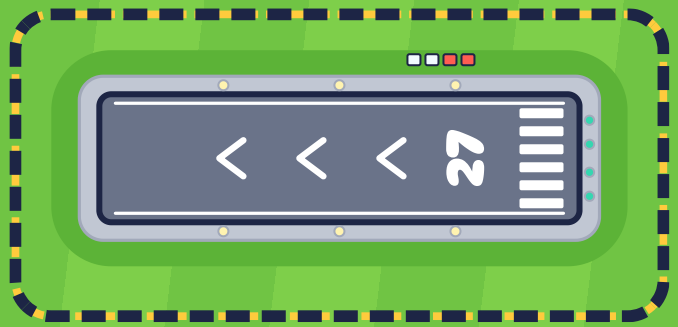

STEP 2 OF 2

Drag to the runway

End the path lined up with the runway.

STEP 2 OF 6

This is runway 27

Airplanes land here. Come in from the right, lined up with the runway.

Got it

STEP 3 OF 6

Light prop inbound

It needs to land.

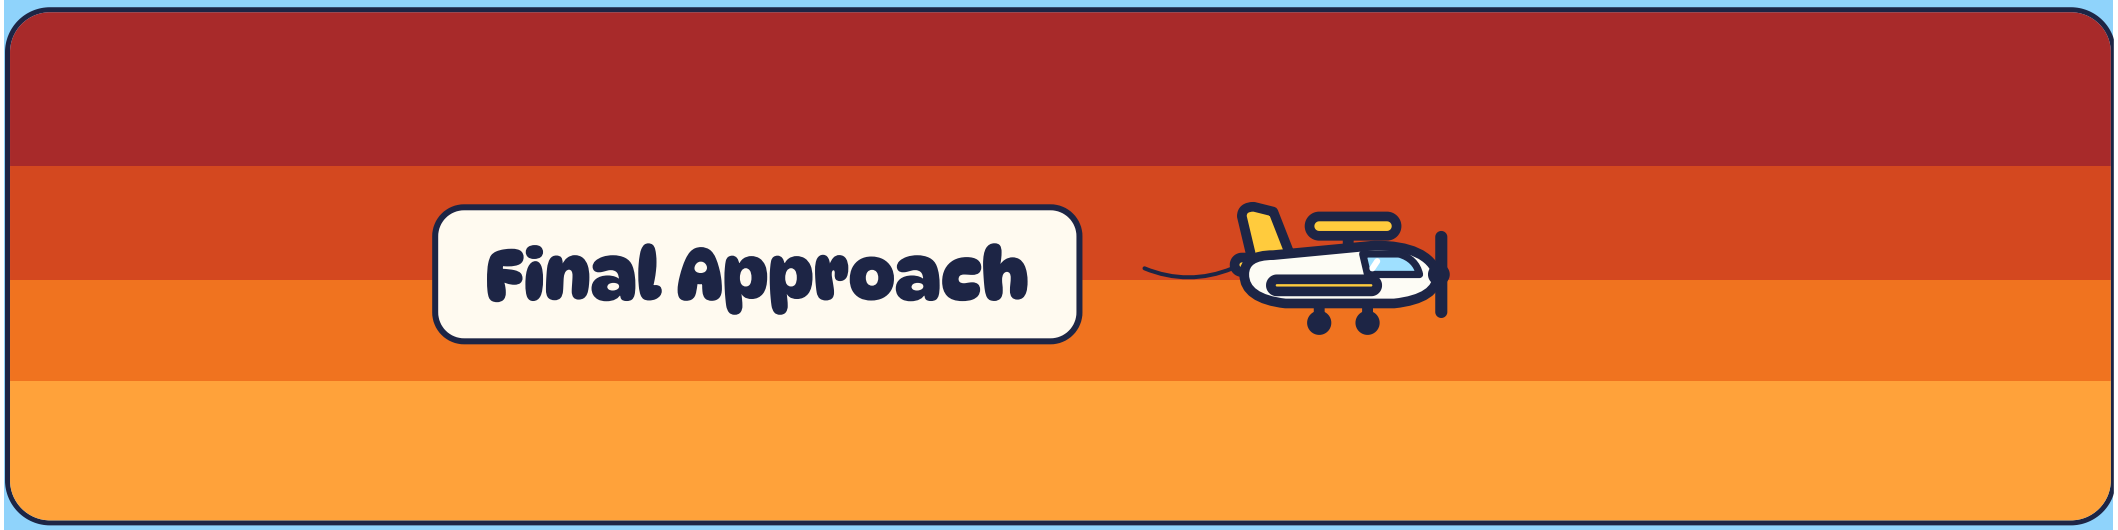

Drag demo (still with reduced motion)

Banner

The banner an airplane tows across the splash page, carrying the name of the game.

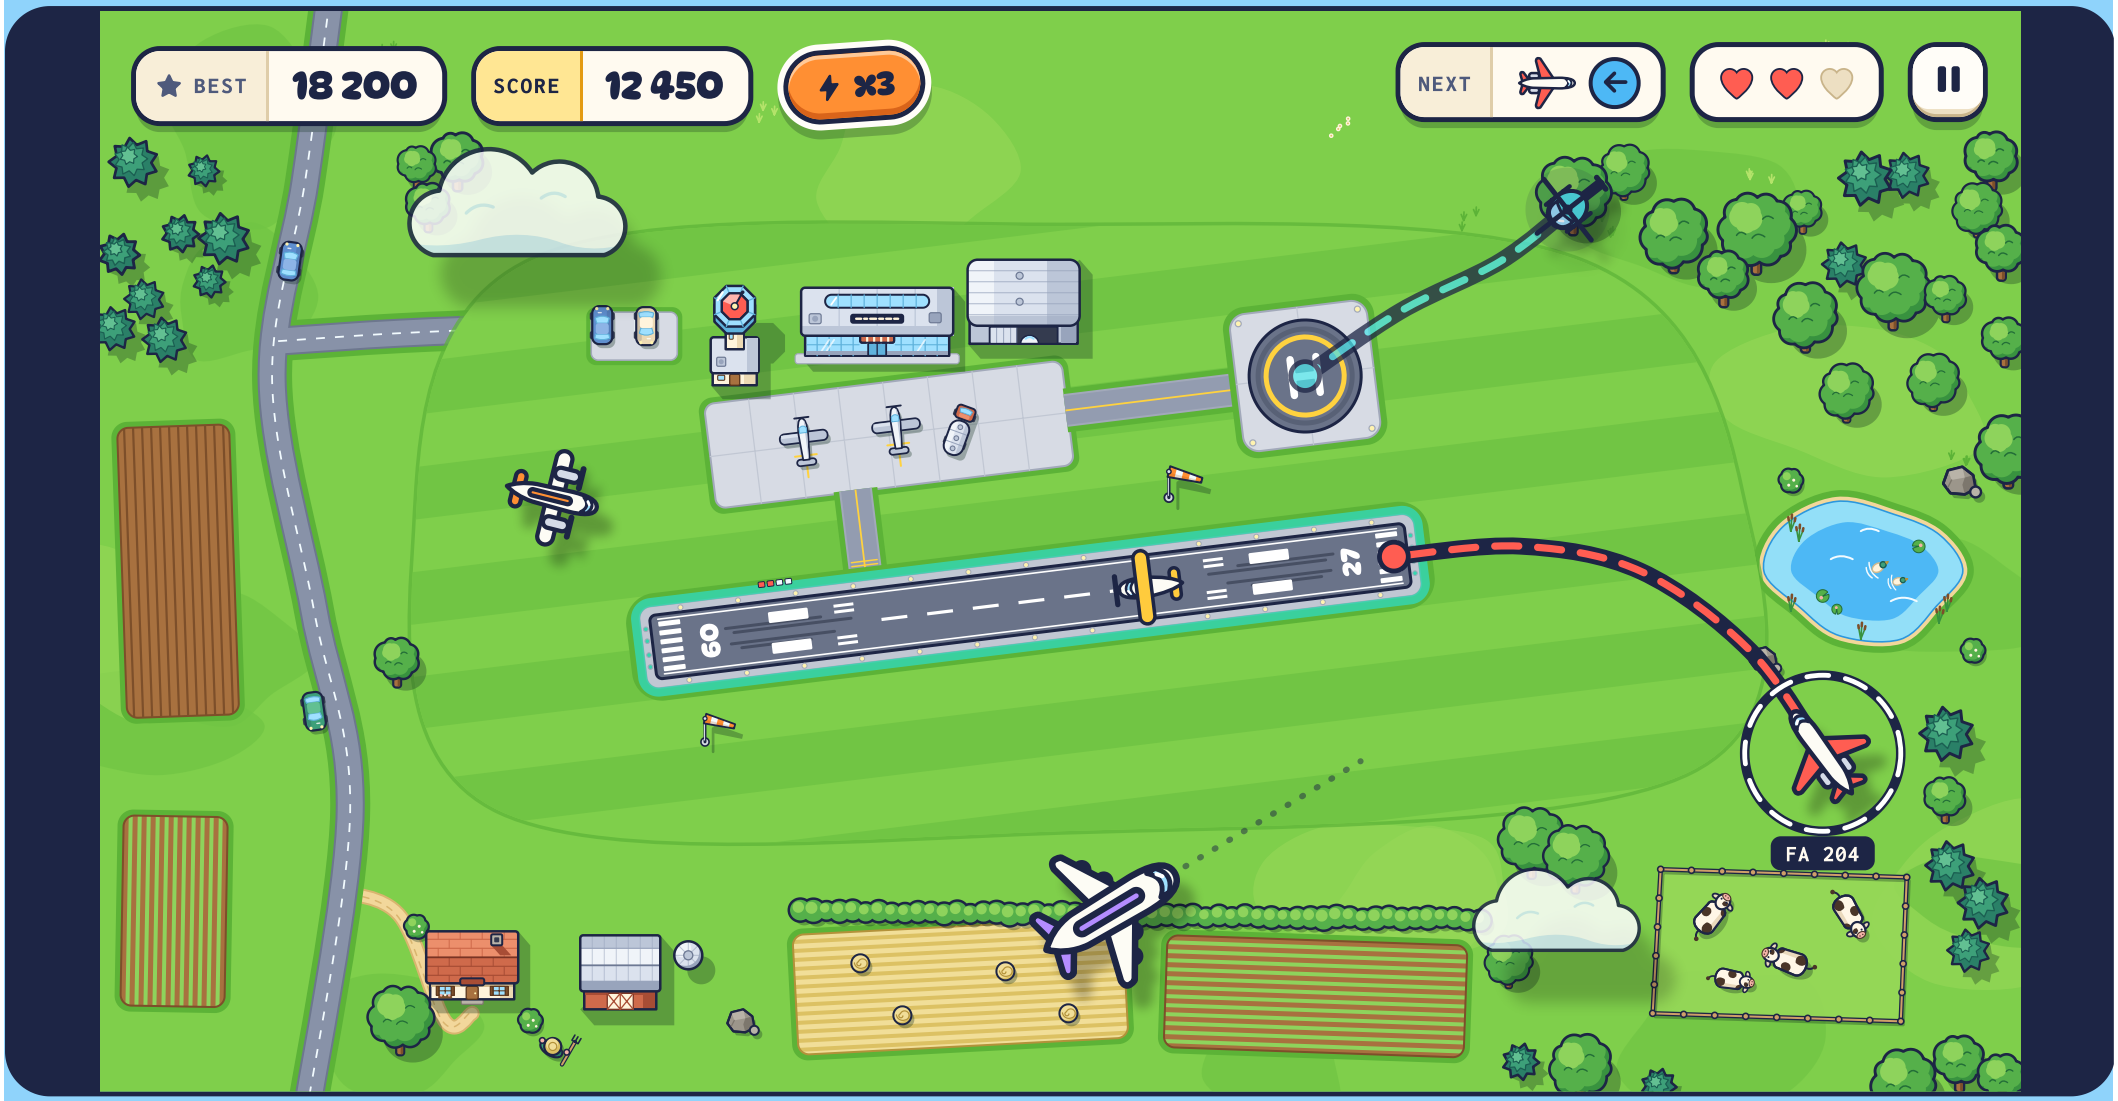

REFERENCE

Screens

Reference compositions at 960 by 540: how the world and the UI layer in each level.

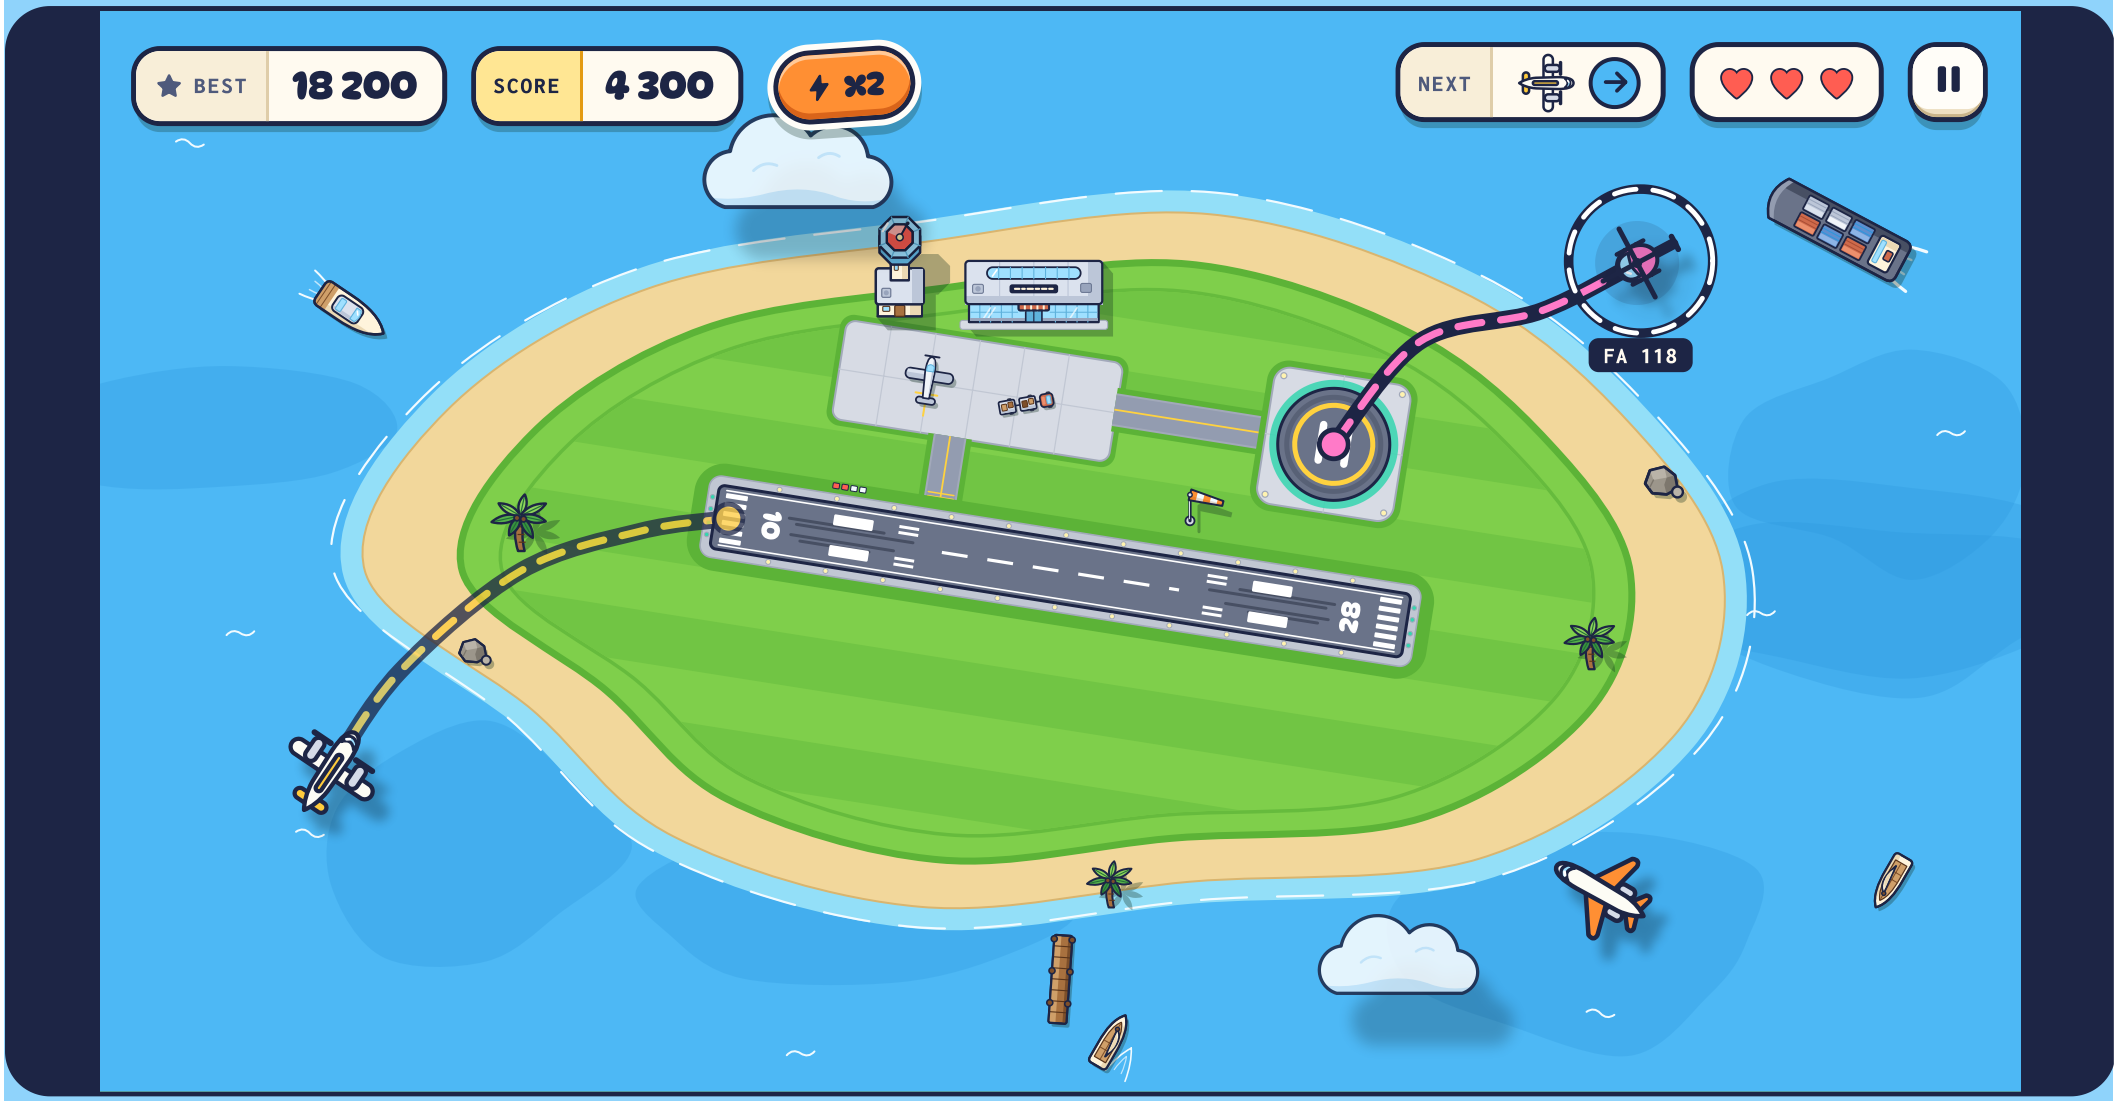

Game Screen: Meadow Field

Day. A jet is selected and cleared onto runway 27; a helicopter is routed to the helipad.

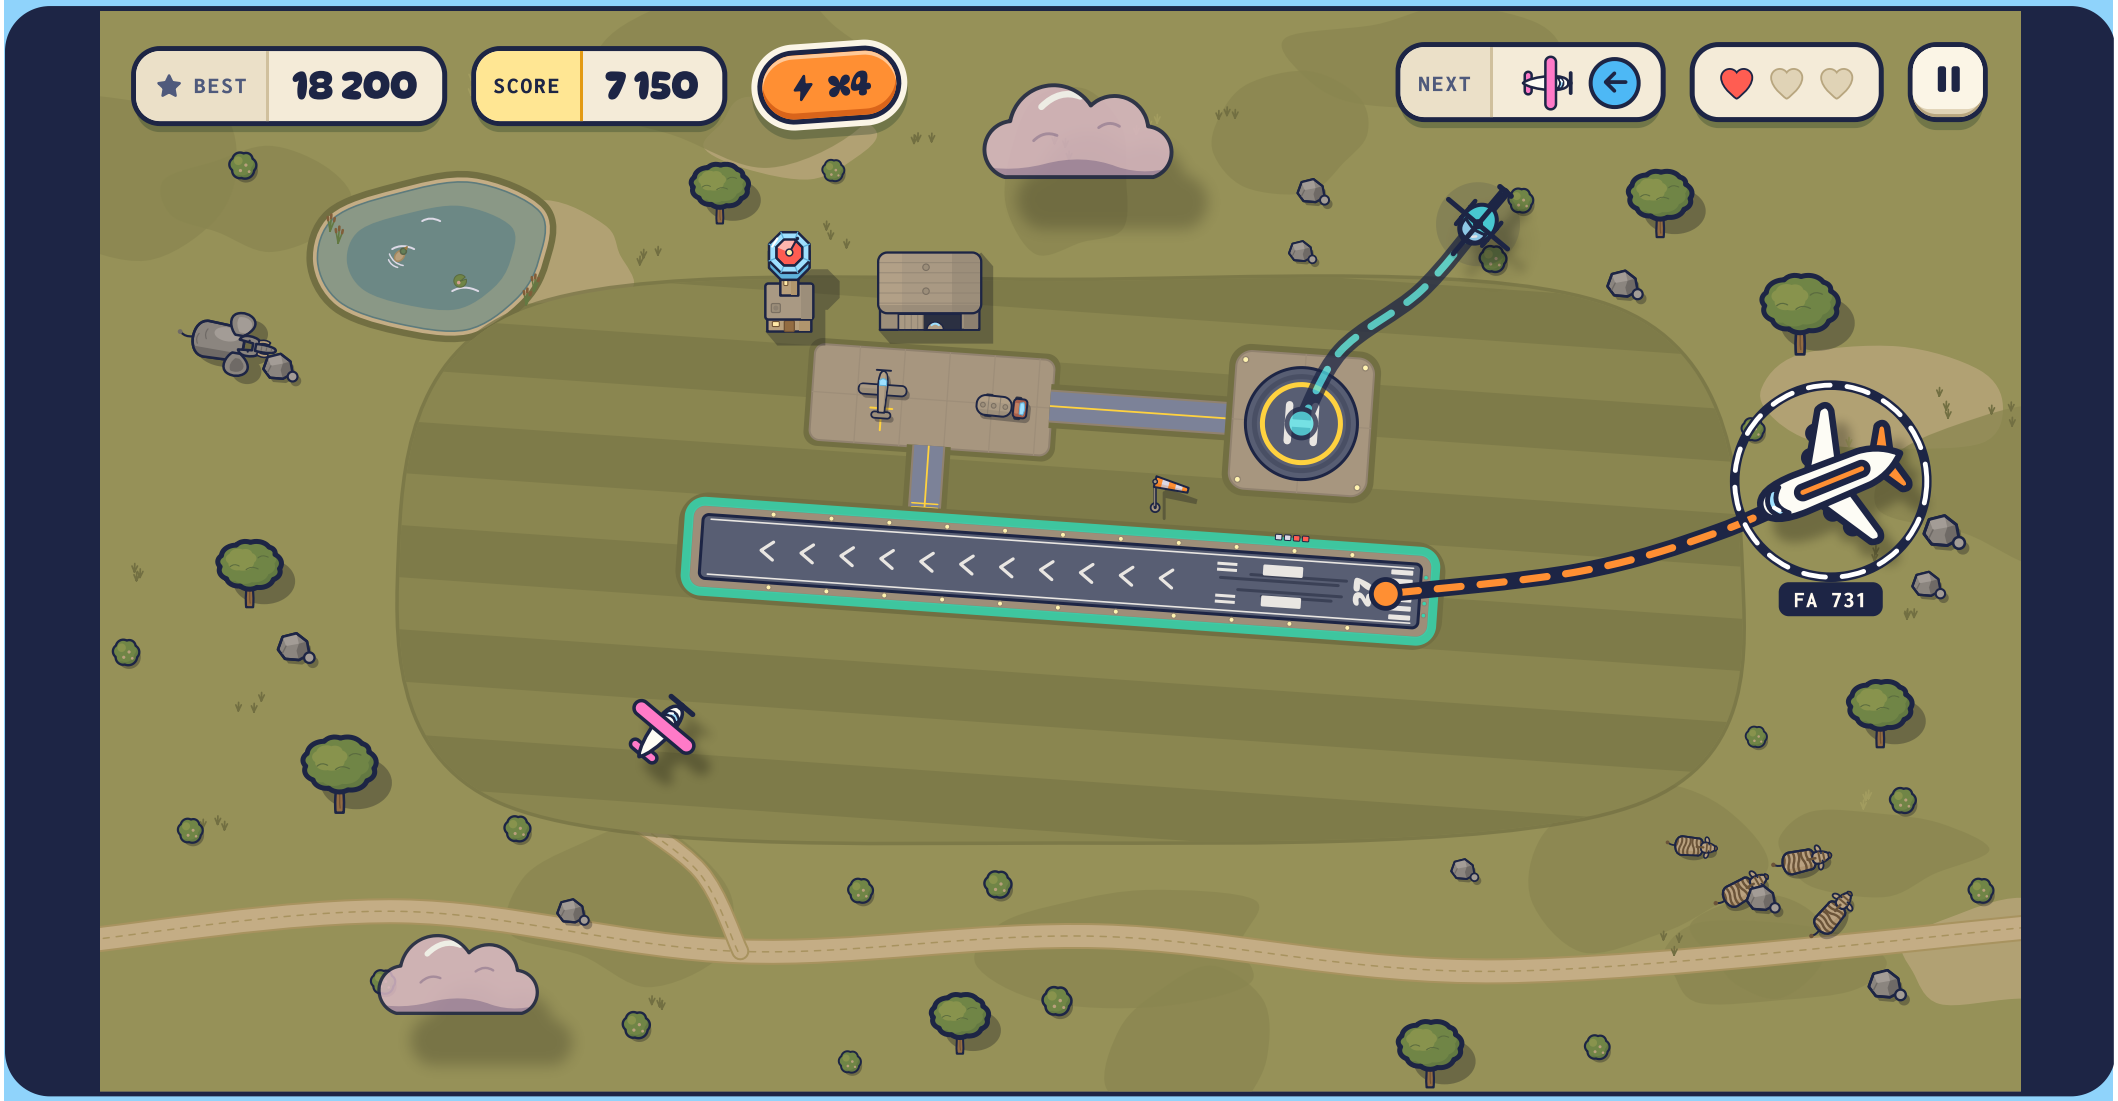

Game Screen: Island

Day. The airfield fills the island; the helipad shows the valid-landing halo.

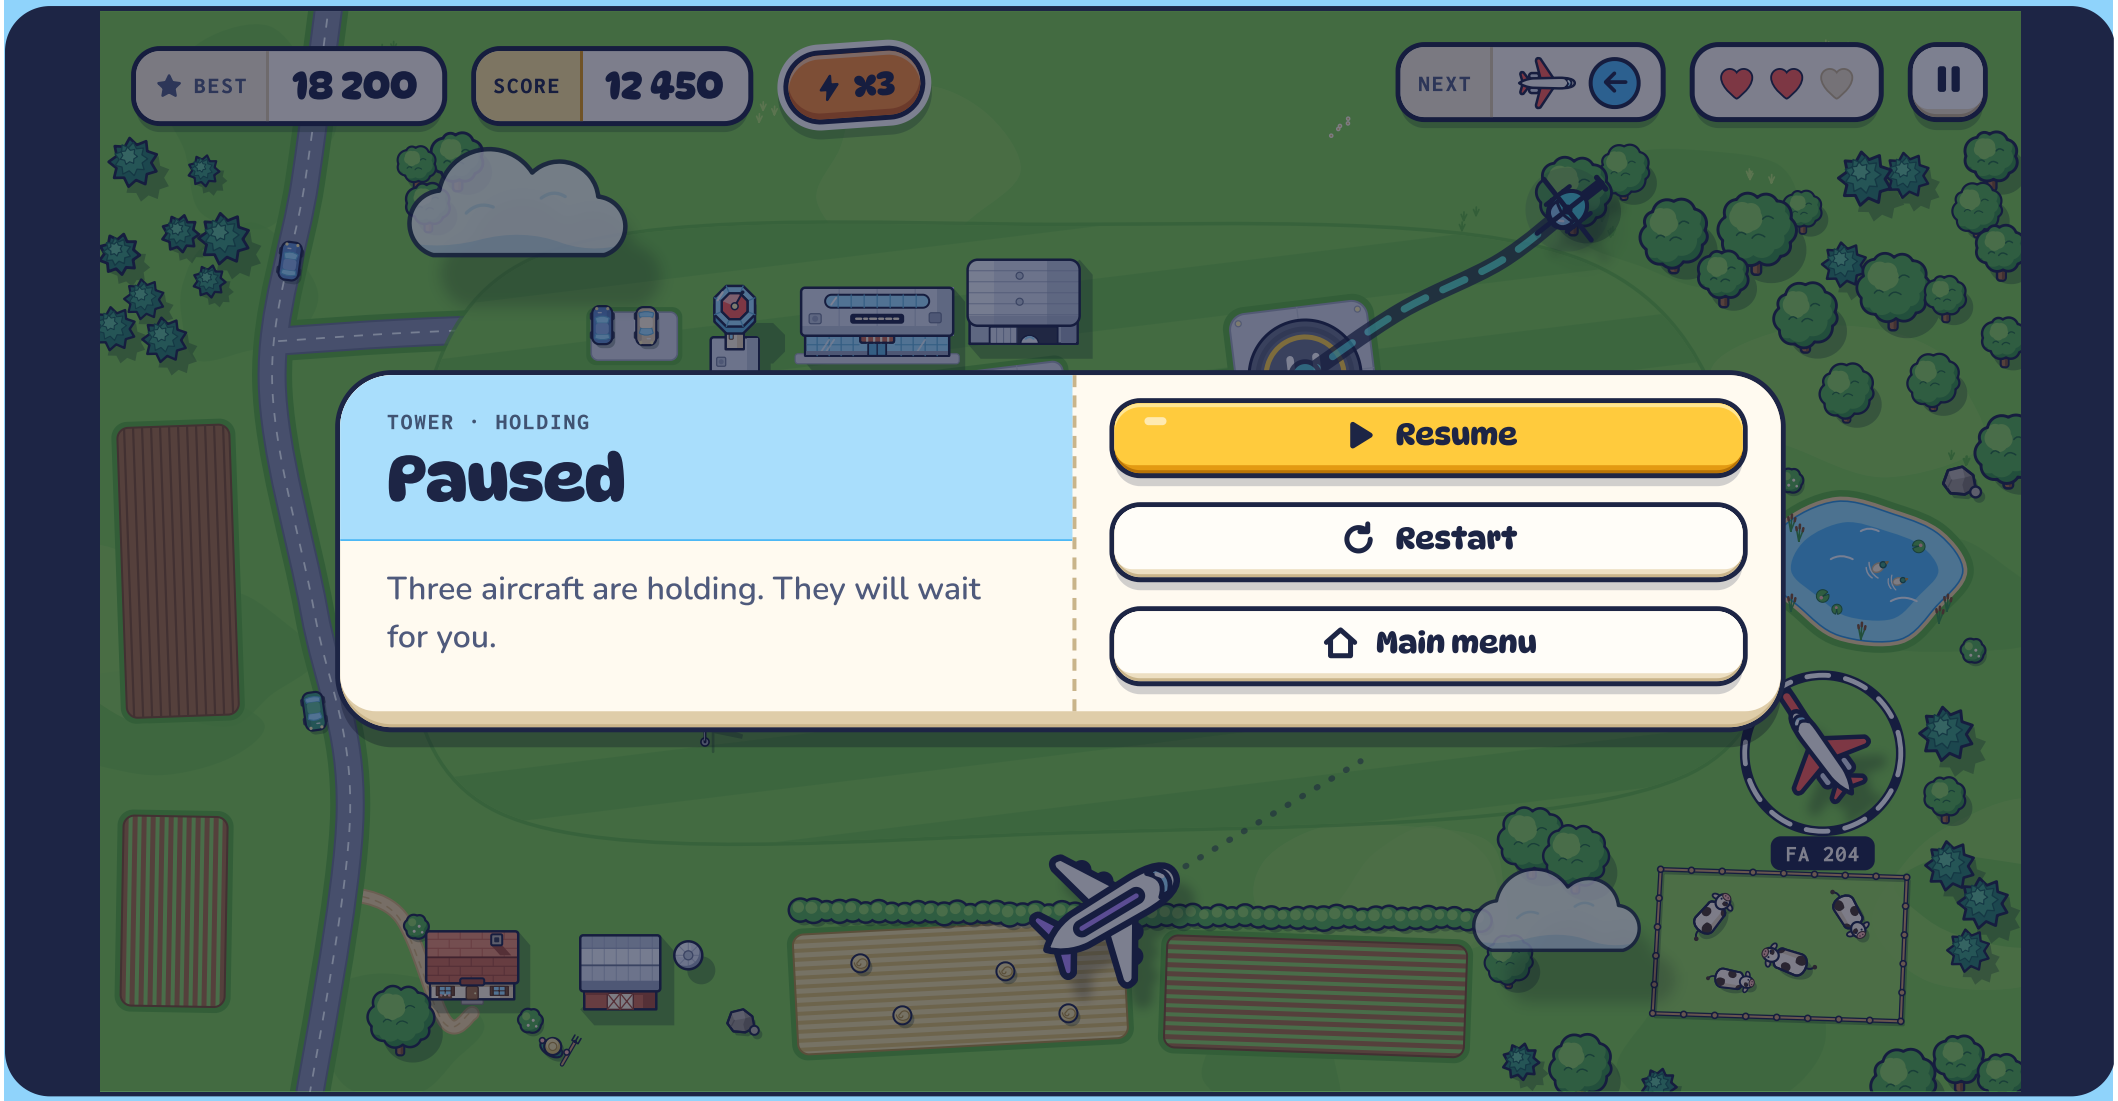

Game Screen: Savanna

Dawn. A one-way runway: only the landing end is marked.

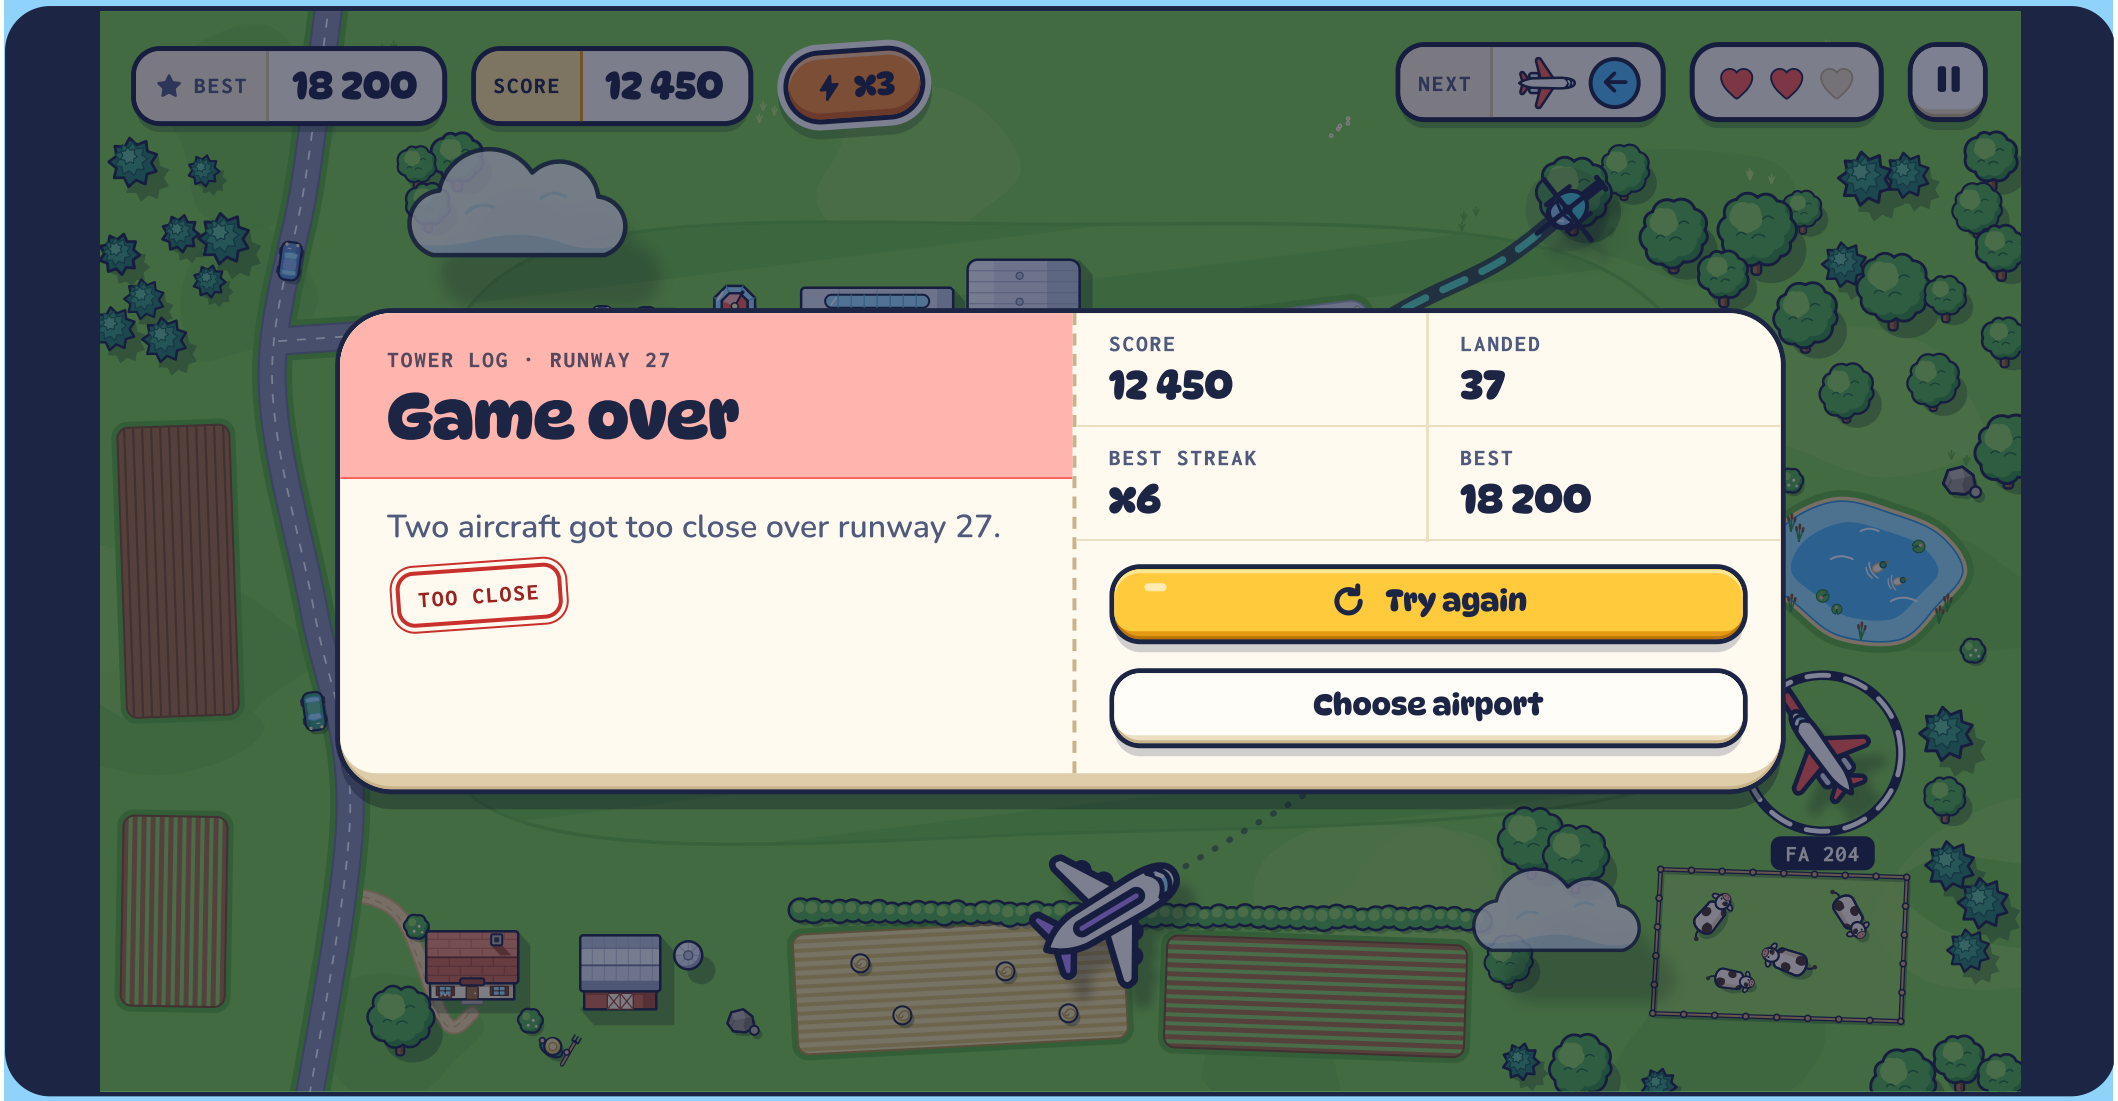

Pause

The pause dialog over the dimmed field.

Game over

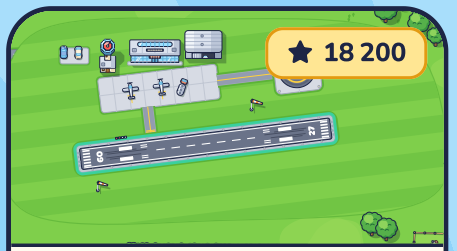

The game-ended dialog over the dimmed field, in its landscape layout.

Level Select

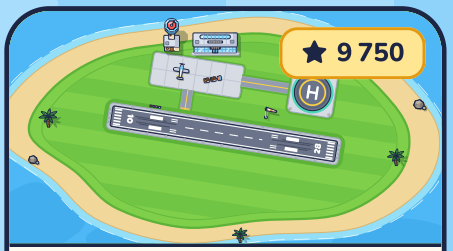

One card per airport on the menu sky.

Choose an airport

1 runway · 1 helipad

Island

1 runway · 1 helipad

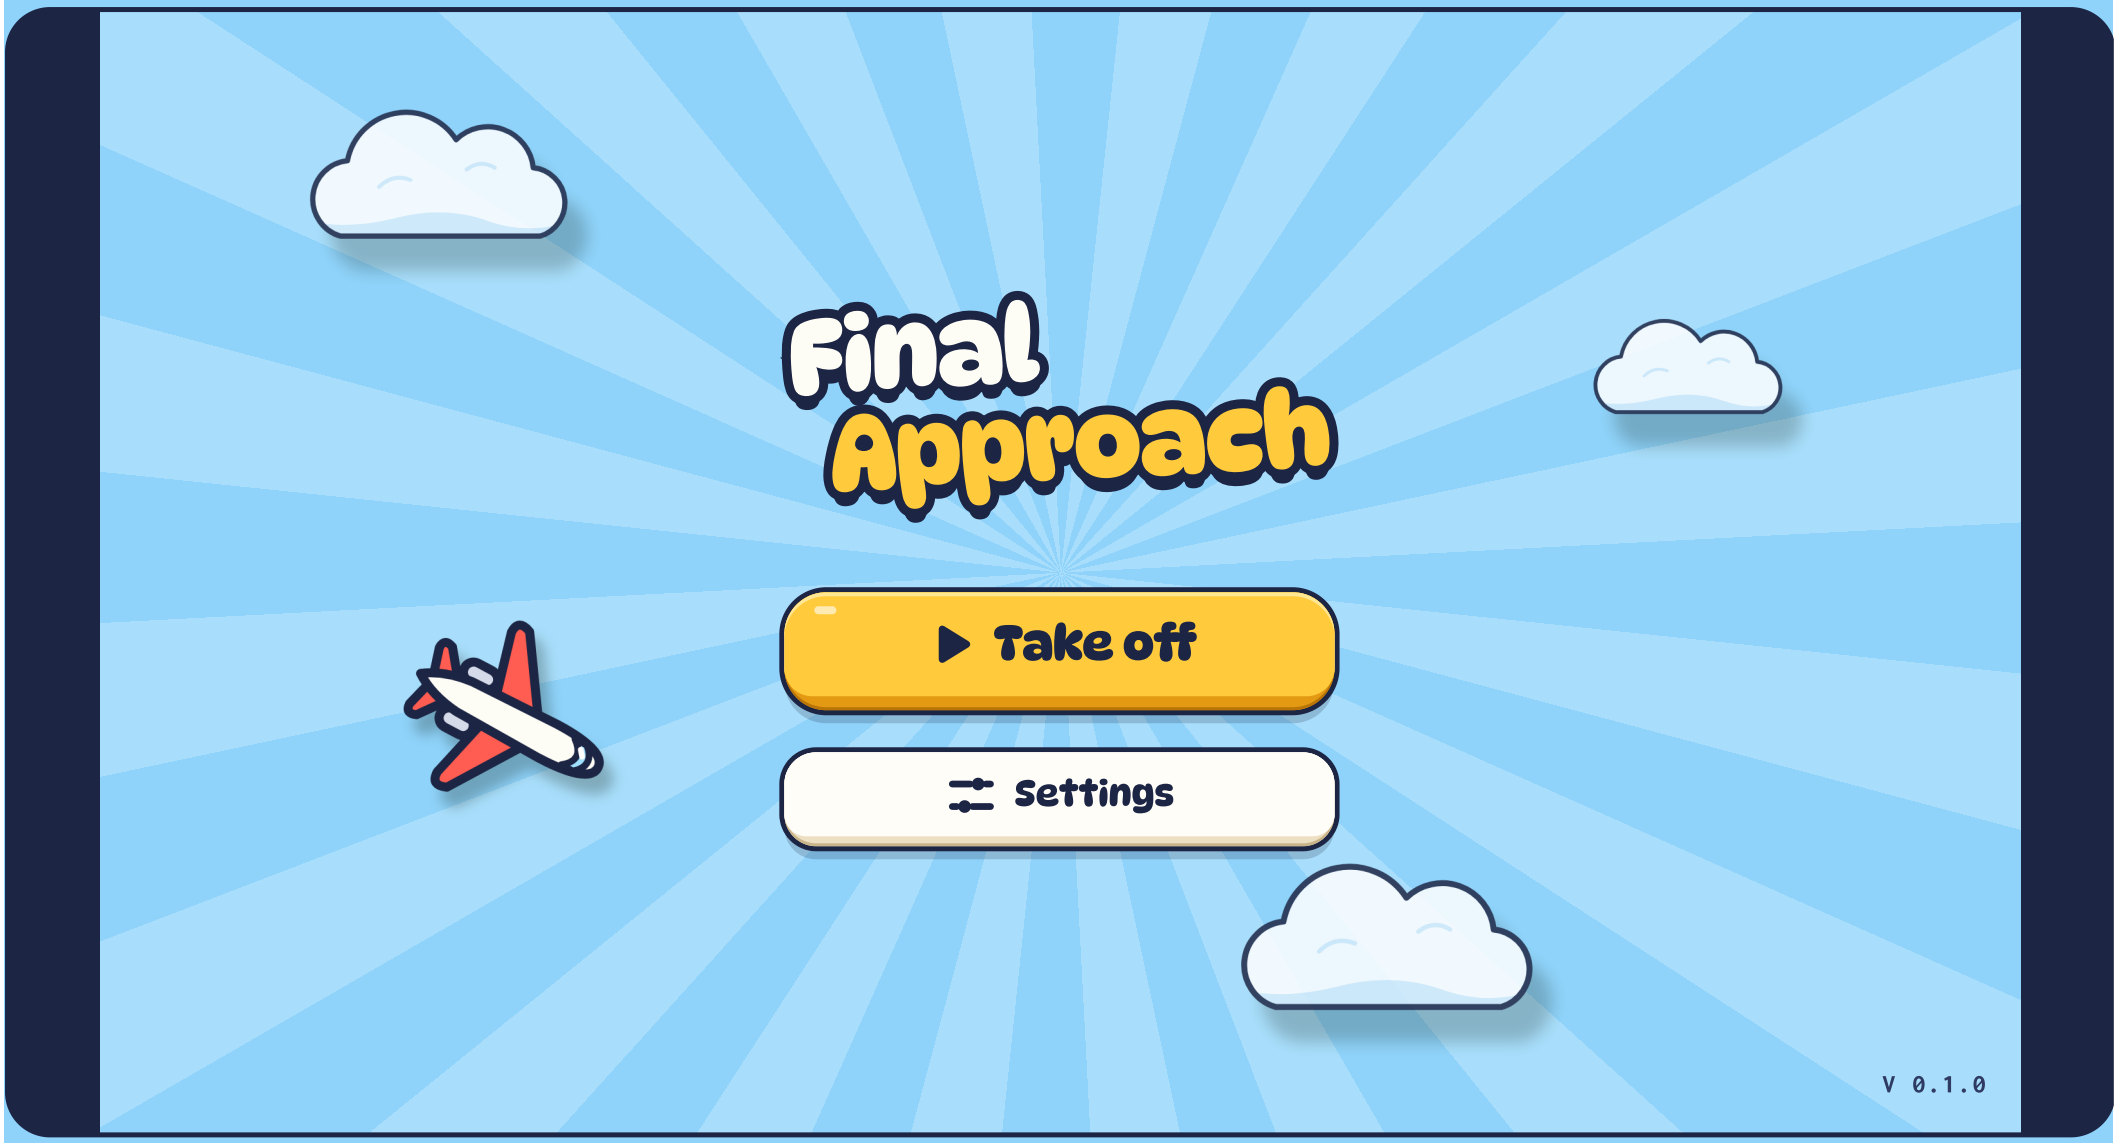

Savanna

Land 50 to unlock

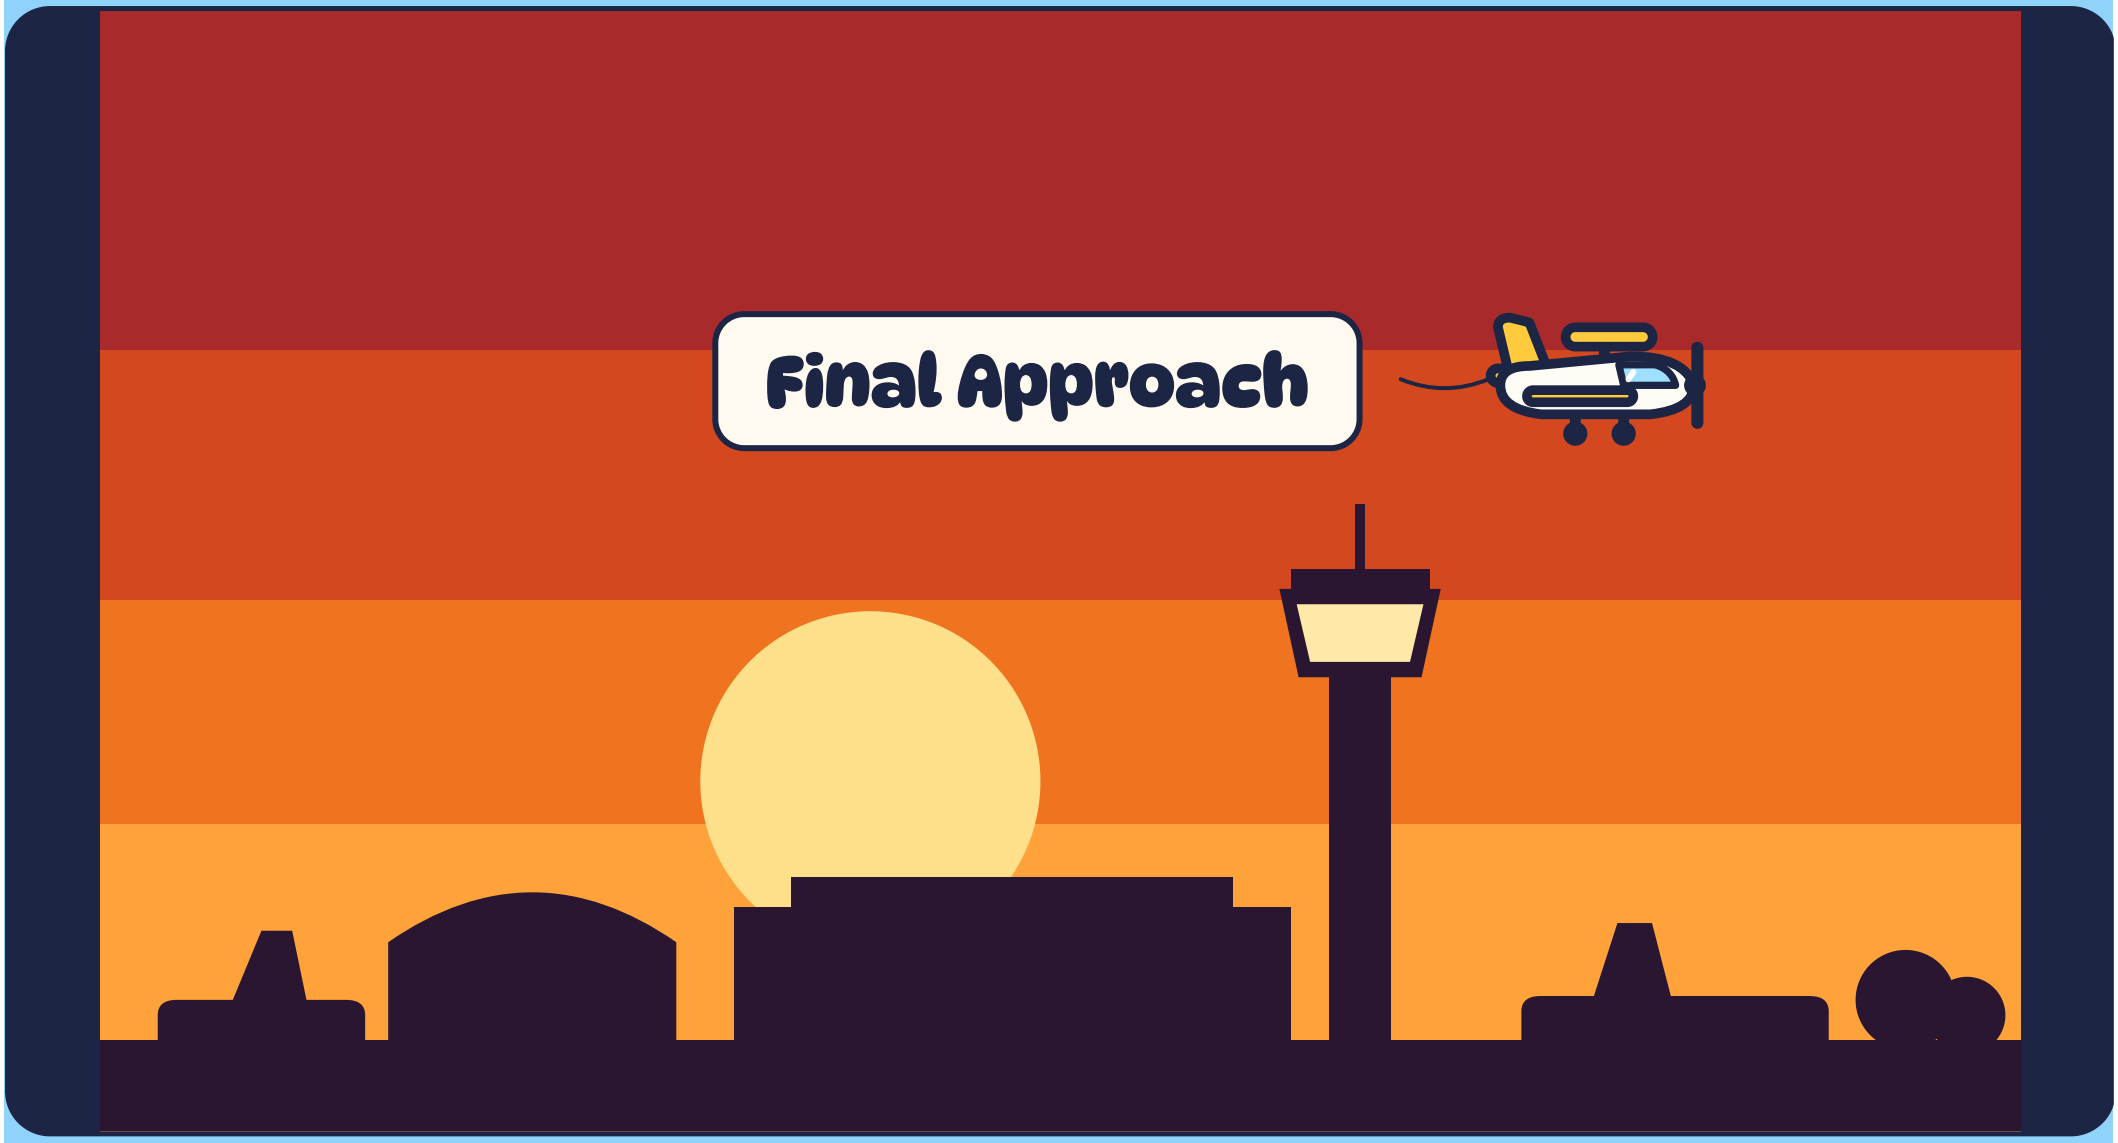

Main Menu

A reference composition of the main page: the wordmark and two buttons in front of the animated sky.

Splash Screen

A reference composition of the splash page: the first screen of the app.

THEMES

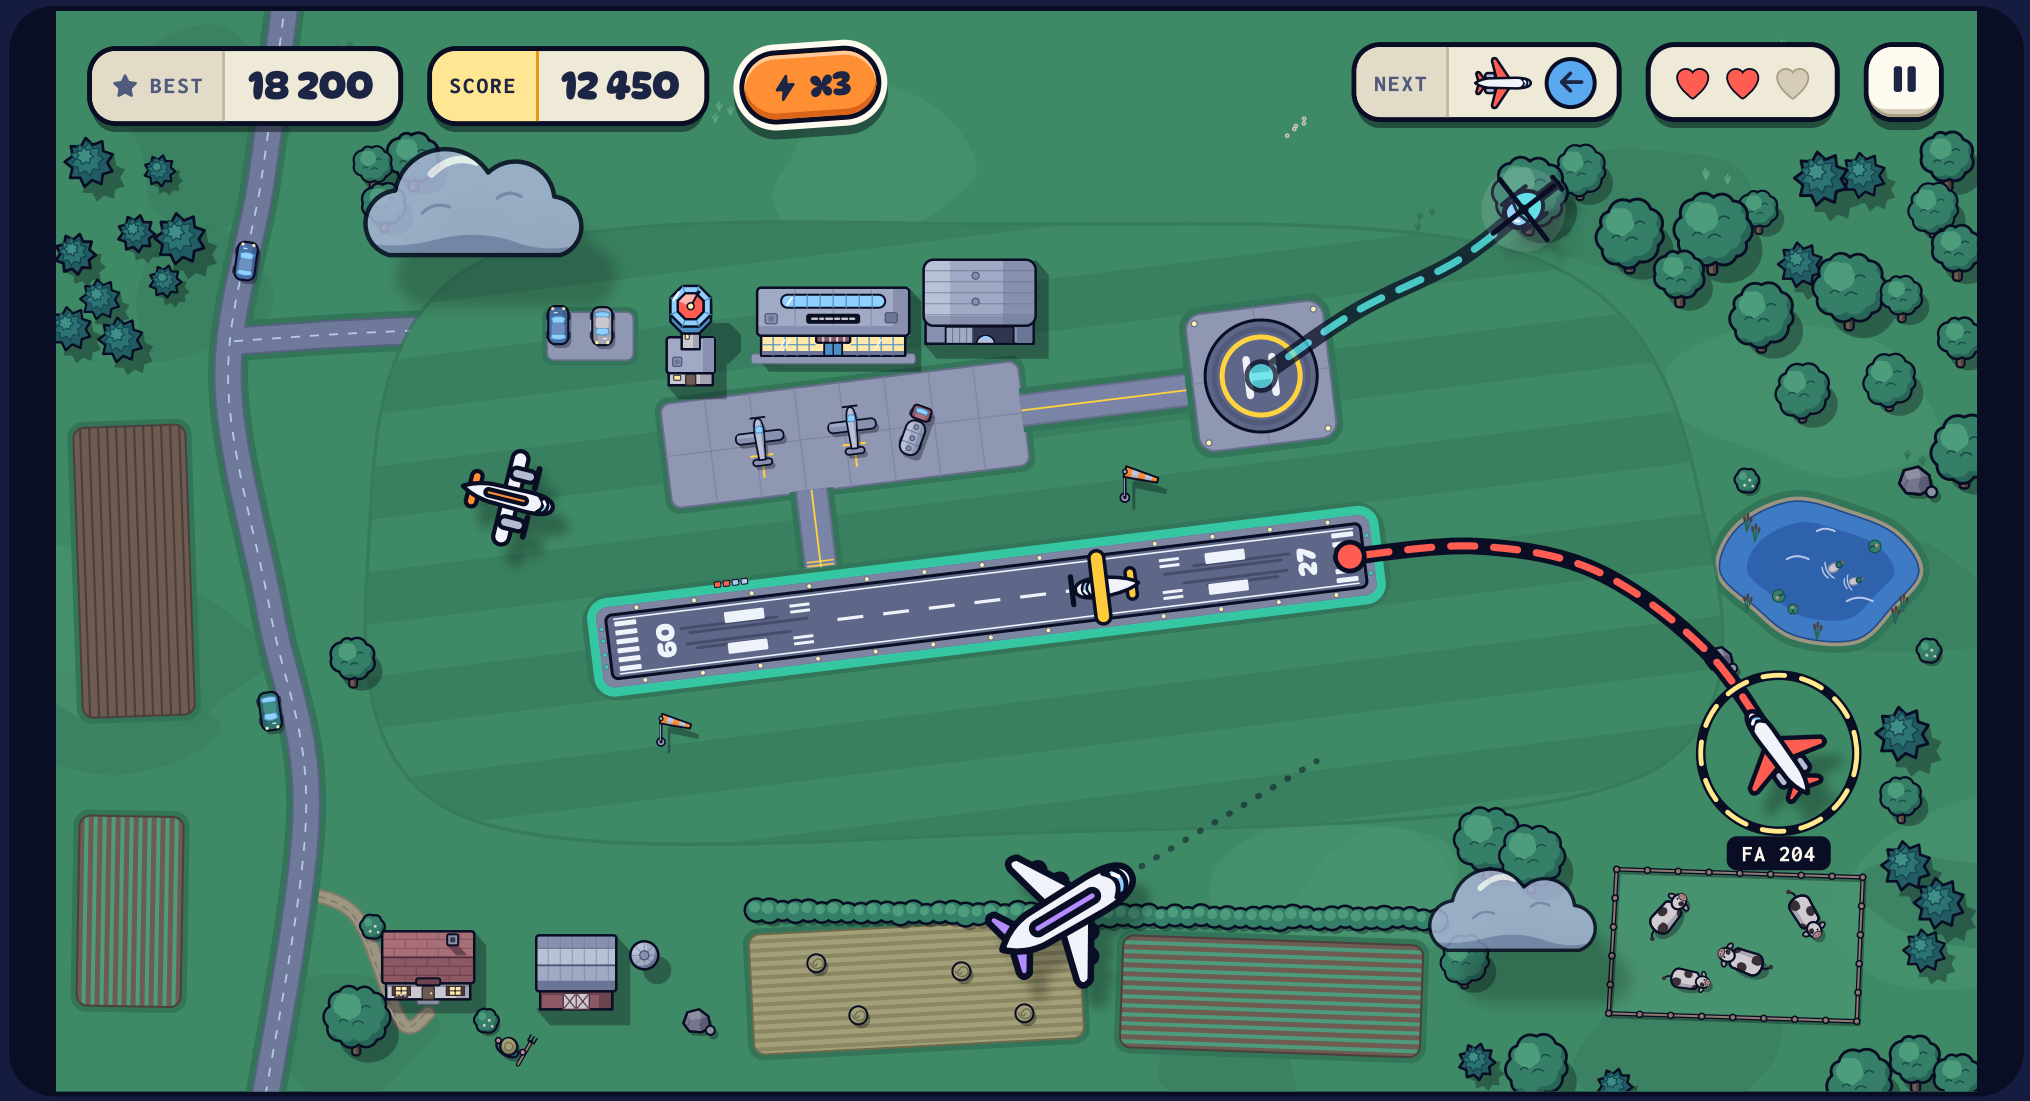

Night

Night darkens the sky and moonlights the field. Paper, strips and aircraft stay light and accents stay bright, so outlines and text hold. The UI is never inverted.

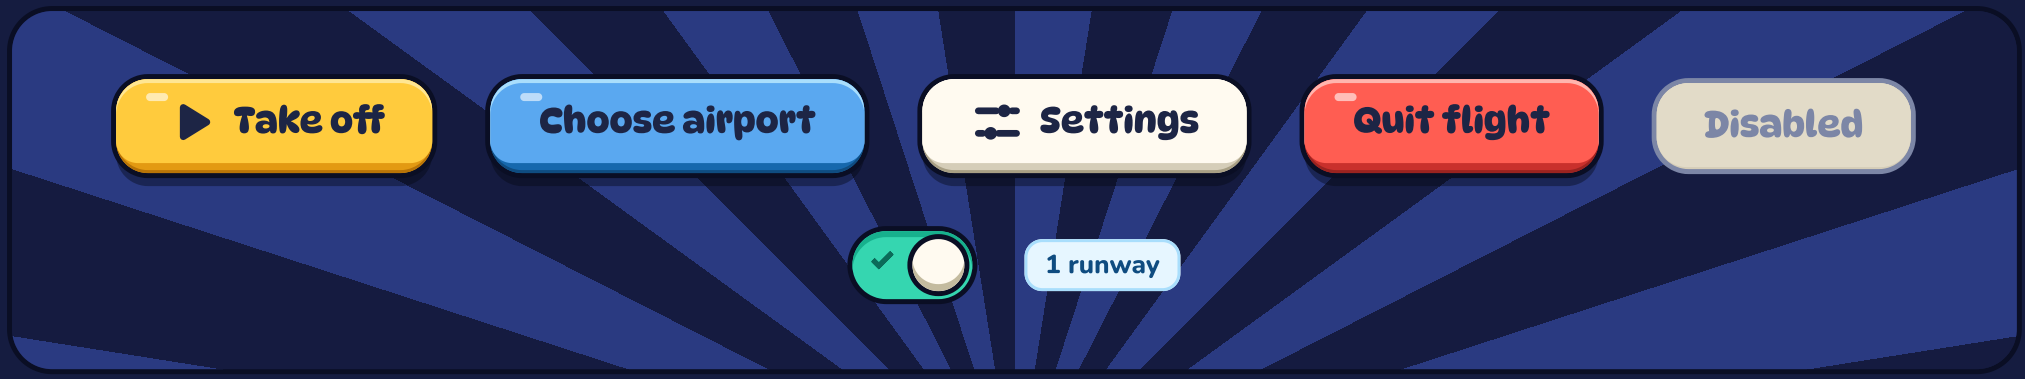

Game Screen

Meadow Field at night, from the same sprites.

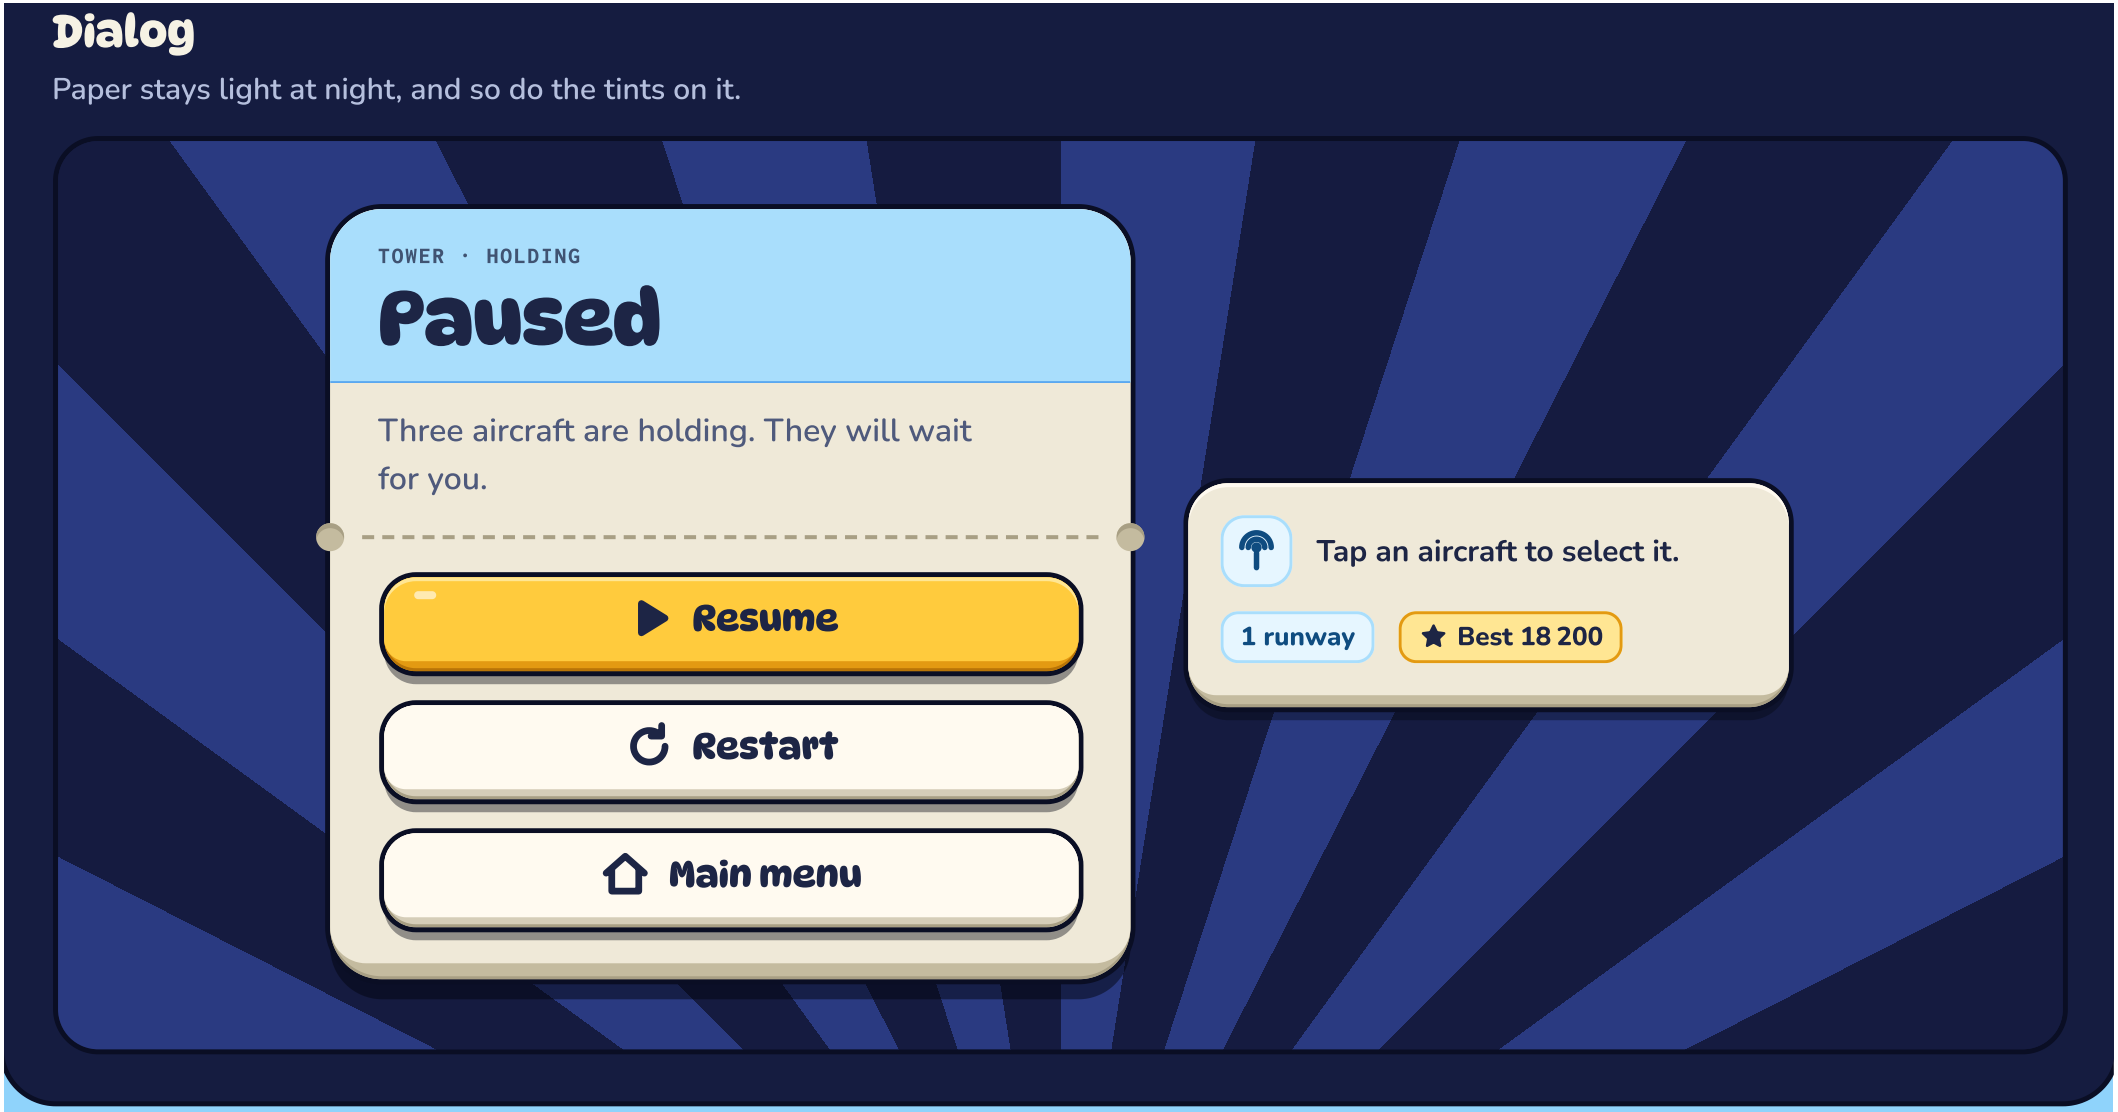

Controls

The same controls on the night sky.

Dialog

Paper stays light at night, and so do the tints on it.

CONTENT

Voice

A friendly tower controller: short, calm, specific. Sentence case, verbs on buttons, no blame, no emoji.

- ✓ Two aircraft got too close over runway 27.
- ✗ ~~Oops! You crashed!!~~
- ✓ Try again
- ✗ ~~OK~~
- ✓ Missed
- ✗ ~~You failed to land the plane~~
- ✓ Tap an aircraft, then drag to draw its path.
- ✗ ~~Utilise touch input to define a trajectory.~~
